Natalie,

Last Saturday we discovered over weekends those of us coming from the outside needed a personal escort at the gate to proceed to the WH. Can that be arranged or will the guards let us through this time?

Thanks thanks!

Good afternoon all,

This email is being sent to all essential staff and assistants. Please share the preliminary agenda and final seating chart with your principals ahead of today's **White House Coronavirus Task Force Meeting at 4:00 pm.**

Please note: Only those accompanying the Vice President will be authorized to call-into this afternoon's meeting.

Thank you,

Natalie Hurst

Operations Coordinator, White House Coronavirus Task Force

Executive Assistant to the Chief of Staff

The Office of the Vice President

Subject: Re: Scheduling for Tuesday

All -

Apologies for another email on this meeting. The meeting will begin promptly at 9:15AM. Please note, the meeting room has been updated to EEOB 374 (SMS Large). This room is a SCIF and all electronic devices must be stored in the lockers outside the room. Please use the WAVES link I sent earlier to submit for building entry. I have updated the time on the back end of the system.

The dial in information remains the same. Please remember to mute your line at the start of the meeting.

Thanks,
Rebecca

Subject: RE: Scheduling for Tuesday

Following up with Dr. Birx availability for Tuesday, (4/28) 10:00am-10:45am

I am going to let this group handle the meeting room, calendar invite to all attendees and IT requirements.
Last time I arranged the meeting, the President's IT support team's time was wasted due to a lack of communication.

You will need to ensure all principals that attended the last meeting are available to attend/invited to this meeting.

Subject: Seeking information re Wuhan Institute of Virology

Dear Dr. Fauci,

First of all, thank you for your great service to our country during the coronavirus crisis.

I am conducting a research on China's bio safety issue for Secretary Pompeo. We understand that the Wuhan Institute of Virology has a joint research project with the NIH on "Cytomegalovirus Gene Function in Virulence and Replication." I assume this is with NIAID.

I would appreciate that you or your office could help us with the following:

- observations, exchanges and agreements with the WIV on the issue of bio safety;
- Bio safety enforcement and inspection mechanisms at WIV or at any other Chinese high BSL labs your institutes have interacted with.
- The extent to which the U.S. has been involved in building the Chinese labs and helping enforce the safety standard and inspections.

To clarify, this is not an investigation, it's only an effort to gather relevant basic facts for the Secretary. I truly appreciate your help, knowing how busy you are these days.

Very respectfully

Hi Dr. Fauci,

First of all, I want to thank you for your research, guidance and your dispensation of facts vs. fiction regarding the Covid-19 virus. Additionally, you have consistently spoken to let the science and data, dictate what our appropriate steps we should take as the general public. As a healthcare worker, who provides care to Covid-19 patients, I appreciate your leadership. I understand, the drug, Remdesivir, has shown to be partially beneficial, in recent clinical trials but any means, it is not a "silver bullet." As I know your plate is full with meetings, briefings and other responsibilities, I would like for you to take a critical look at the drug, (b) (5)

(b) (5)

I believe this drug can be a game changer and further prevent unnecessary deaths.

Thank you for your time.

Sincerely,

(b) (6) R.T. (R)

Tony,

You most likely don't remember me. I am a (b) (6) Army Medical WMD MSC Officer. I first met you when I was in Grad school at Georgetown (b) (6). During my Army Career I had the privilege of working for many years with COL (Dr) Mike Benenson, (b) (6) Dr Abram Bennenson was the Editor Emeritus of the original CDM manual. My Academic training was as a Health Physicist and in severe Reactor Accident Protective Action Decision making. In my 27 year Army career I worked in broad Medical WMD. Have been in USAMRID with Ed Eitzen, etc and have known Dr Kadlic for years

We reconnected at one of the first PCCs on COVID in January. I have been fully engaged working every day since then.

You and Dr Deb Brix are doing a great job for our Nation and all mankind. I salute you both.

I am an info maniac and read everything. I see these TF Data products every day.

(b) (5)

I am sure Dr Bix has done this already. Please forward my email to her if you think helpful.

Subject: RE: Information for Clinicians on COVID-19 Therapies

Folks:

Of note, there is an interagency working group that has just developed recommendations as well. I think it important that any document that comes out is harmonized with that effort. Below is a draft of a somewhat different initial paragraph to give you an idea of where I think this needs to go:

At present in the US there are no licensed, approved drugs specifically for the treatment of patients with COVID-19. As of March 19, 2020, clinical management includes infection prevention and control support measures and supportive care including supplementary oxygen and mechanical ventilatory support when indicated. An array of drugs licensed for other indications as well as several investigational drugs are being studied in several hundred clinical trials that are underway across the globe. While a variety of reports have appeared in the medical literature and the lay press claiming successful treatment with some of these agents it is important to stress that at this time there is no drug that has been shown to be safe and effective for the treatment of COVID-19. The purpose of this document is to provide information on three of the licensed drugs (chloroquine, hydroxychloroquine and kaletra) and one of the investigational agents (remdesivir) currently in use in the US.

Happy to discuss.
Best regards,
Tony

Ambassador Birx, I look forward to connecting with you as soon as possible. As you know, Roche Diagnostics was in close contact with you as it relates to the EUA for fully automated SARS-CoV-2 molecular diagnostic. Additionally, I'd like to detail our extensive efforts to contribute to COVID-19 response, specifically relating to our medicine Actemra (tocilizimab).

Specifically, I would like to update you on:

- Our submission of an IND for a randomized controlled trial of Actemra (tocilizimab) in severely ill COVID-19 patients
- Our intent to donate 10,000 vials of Actemra to the Strategic National Stockpile for future use at the discretion of the USG
- Our experience globally in China, Italy, and other countries relating to the use and demand
- Our thinking around distribution of product to best ensure patient access
- Our initial thinking on key supply issues including increased global demand and our thinking around our domestic infrastructure

Nat:

After much internal discussion, we finalized the attached memo. I sent this to Joe Grogan as he asked for something as well. This is ripe for the White House Coronavirus Task Force as there must be coordination across multiple agencies. Roche/Genentech stands ready to do everything we can to support the US Government's efforts during this pandemic. Both FDA and BARDA have been incredible partners to date. The 4,000 units is an initial donation to treat approximately 1,000-1250 patients. More supply will be donated if needed.

Let's discuss when you have a free moment.

Best

Fritz

Subject: Genentech and COVID-19

Dear Joe:

Attached is the memo that we discussed. Genentech has had very productive on-going conversations with both FDA and BARDA regarding possible usage of Actemra to treat a sub-set of very ill COVID-19 patients.

- Genentech/Roche's priority is to conduct a randomized, controlled clinical trial to test the

safety and efficacy of Actemra (tocilizumab) for the treatment of severely ill COVID-19 patients

- Toward this end, we are committed to working with the FDA, in collaboration with BARDA, to develop, enroll, and complete this clinical study as our first priority
- Separately, we seek to enter into an agreement with BARDA under our existing Other Transactions Authority (OTA) agreement that would allow for a donation of an initial 4000 vials of Actemra to the U.S. government reserved for patient treatment outside of the clinical trial, only in the event of an escalating emergency, should physicians decide to prescribe this product off label.
- Under this agreement, Genentech would seek assistance from BARDA (and appropriate federal agencies) to develop and disseminate guidelines for appropriate clinical use and to coordinate with Genentech's distribution capabilities.

We stand ready to discuss this further at anytime.

Best regards,

Fritz Bittenbender

Senior Vice President
Genentech

Subject: In town print pool #2: POTUS on coronavirus vaccine

In an oval office spray, the president says a meeting with pharmaceutical executives today originally scheduled to discuss drug prices will instead be used to discuss a coronavirus vaccine.

"We're talking about a vaccine, maybe even a cure," the president said.

Full remarks to come.

All,

There will be a **White House Coronavirus Task Force Principals Meeting** on **Thursday, March 5, at 3:30 pm EST** in the **White House Situation Room**. All materials will be forthcoming.

Please note: Due to scheduled travel, the Vice President will convene this meeting over the phone. All principals not accompanying the Vice President on tomorrow's trip will be expected to attend the meeting in person.

Thank you,

Subject: Conference Call

Dear colleagues,

I have cancelled my trip (b) (6) so I can focus on the Coronavirus (b) (6), so am asking that we find time for a conference call tomorrow (Tuesday) to discuss agency R&D activities and cross-agency coordination. Kim Doster, copied here, will coordinate. If you have gathered information from your agency per my message Saturday, please send it asap and I will concatenate and send it to the group prior to the call.

Thank you!!

Sincerely,

Kelvin

Subject: Re: Centralized Communications

Following up on yesterday regarding comms:

The VP has asked, and I think we would agree it makes perfect sense, to coordinate ALL media on coronavirus through his office. This includes cabinet secretaries, members of the task force, and WH officials.

If everyone can reach out to Katie Miller (copied here) that would be great.

This includes folks who are booked for tomorrow.

Please let me and/or Marc Short know if you have any questions.

Many thanks. And nice job today, all the way around.

MM

On Feb 25, 2020, at 6:33 PM, Mulvaney, Mick M. EOP/WHO (b) (6)>
wrote:

All:

I think everybody recognizes and appreciates the value of a coordinated messaging strategy as we move forward on the coronavirus issue. For that reason, I've asked the WH, NSC and HHS tams to come up with an "approved" list of folks to speak for the Administration on this topic. These are folks who are involved with the details day-to-day, and should have the very best and most up-to-date information. It is imperative that our

message is internally consistent, and having data that are even 24 hours out-of-date can be problematic.

With that in mind, here is the list, with their particular focus/specialty:

Top Tier/Priority:

HHS Sec. Azar (Lead Admin Response/Public Health)
Director of NIAID Dr. Fauci (Public Health)
NEC Director Larry Kudlow (Economy)
NSC Director Amb O'Brien (Admin Response/National Security)
DHS Dep Sec Cuccinelli (Travel/Homeland Security)
Director of the Center for the National Center for Immunization and Respiratory Diseases (NCIRD) Dr. Nancy Messonnier, MD (Public Health)
Sec. Pompeo (Foreign Relations)
Dep Sec State Biegun (Travel/Foreign Relations)

Tier B:

CDC Director Redfield (Public Health)
OMB Dir Russ Vought (Budget & Supplemental Appropriations)
DPC Dir Joe Grogan (Task Force/Public Health)
Principal Deputy Director of the Centers for Disease Control Anne Schuchat (Public Health)
HHS Assistant Secretary for Preparedness and Response (ASPR) Robert Kadlec (Public Health)
Department of Transportation Acting Under Secretary for Policy Joel Szabat (Travel)
Commissioner of Food and Drugs Stephen Hahn (Public Health)

If anyone who is not on this list wants to do press, I am asking that they please clear it with WH Comms (Jess Ditto) so that we can make sure you have the most recent messaging. Please know that you are NOT the only people getting this message: I gave the exact same instructions to the chiefs of staff for all the Cabinet Secretaries today. This is a whole-of-government effort.

This is critically important. If you have any questions, please let me know. And thanks to everyone for their cooperation on this.

Mick M.

Subject: President Trump's Science Advisor and the National Academies of Sciences, Engineering, and Medicine Commit to Collaborative Effort on the Coronavirus

THE WHITE HOUSE
Office of Science and Technology Policy

FOR IMMEDIATE RELEASE

February 7, 2020

President Trump's Science Advisor and the National Academies of Sciences, Engineering, and Medicine Commit to Collaborative Effort on the Coronavirus

White House OSTP and NASEM to Gather Subject Matter Experts on Origination of 2019-nCoV

Yesterday, Dr. Kelvin Droegemeier, Director of The White House Office of Science and Technology Policy (OSTP) sent a letter to Dr. Marcia McNutt, President of the National Academy of Sciences, calling for the National Academies of Sciences, Engineering, and Medicine (NASEM) to rapidly examine information and identify data requirements that would help determine the origins of 2019-nCoV.

"Although a widely-disputed paper, 'Uncanny similarity of unique inserts in the 2019-nCoV spike protein to HIV-1 gp120 and Hag,' posted on the pre-print server bioRxiv last week has been withdrawn, the response to that manuscript highlights the need to determine information and data requirements as quickly as possible to better perform and validate such analyses of origin. These questions are important not only for this current situation, but to inform future outbreak preparation and better understand animal/human and environmental transmission aspects of coronaviruses. As part of a broader deliberative process, this review will aid preparedness for future events by establishing a process that quickly assembles subject matter experts for evaluating other potentially threatening organisms.

OSTP requests NASEM convene a meeting of experts, particularly world class geneticists, coronavirus experts, and evolutionary biologists, to assess what data, information, and samples are needed to address the unknowns, in order to understand the evolutionary origins of 2019-nCoV and more effectively respond to both the outbreak and any resulting misinformation. I request a letter statement from the National Academies be prepared and provided in response to this solicitation. A more in-depth examination of the issues will be established as a follow up as needed," **Dr. Kelvin Droegemeier wrote in the letter.**

Please find the letter to Dr. McNutt attached.

Subsequently, the National Academies of Sciences, Engineering, and Medicine responded in a joint letter from Dr. Marcia McNutt, President of the National Academy of Sciences; Dr. John L. Anderson, President of the National Academy of Engineering; and Dr. Victor J. Dzau, President of the National Academy of Medicine.

“In response to your request, we consulted leading experts in the fields of virology, infectious disease genomics, genome sciences, epidemiology, microbiology, immunobiology, coronaviruses, emerging infections, biosecurity, and global health. We wanted their views about the data needs that could help elucidate the origin and evolution of 2019-nCoV.

“The National Academies stand ready to assemble a committee of experts to examine these issues in more detail and provide evidence-based advice to you in an expedited manner if requested. We appreciate your trust in the National Academies and our efforts to advise the nation and inform public policy decisions,”
the three presidents wrote in the letter.

Please find the letter from NASEM presidents to Dr. Droegemeier attached.

Subject: President Trump's Science Advisor and the National Academies of Sciences, Engineering, and Medicine Commit to Collaborative Effort on the Coronavirus

THE WHITE HOUSE

Office of Science and Technology Policy

FOR IMMEDIATE RELEASE

February 7, 2020

President Trump's Science Advisor and the National Academies of Sciences, Engineering, and Medicine Commit to Collaborative Effort on the Coronavirus

White House OSTP and NASEM to Gather Subject Matter Experts on Origination of 2019-nCoV

Yesterday, Dr. Kelvin Droegemeier, Director of The White House Office of Science and Technology Policy (OSTP) sent a letter to Dr. Marcia McNutt, President of the National Academy of Sciences, calling for the National Academies of Sciences, Engineering, and Medicine (NASEM) to rapidly examine information and identify data requirements that would help determine the origins of 2019-nCoV.

“Although a widely-disputed paper, ‘Uncanny similarity of unique inserts in the 2019-nCoV spike protein to HIV-1 gp120 and Hag,’ posted on the pre-print server bioRxiv last week has been withdrawn, the response to that manuscript highlights the need to determine information and data requirements as quickly as possible to better perform and validate such analyses of origin. These questions are important not only for this current situation, but to inform future outbreak preparation and better understand animal/human and environmental transmission aspects of coronaviruses. As part of a broader deliberative process, this review will aid preparedness for future events by establishing a process that quickly assembles subject matter experts for evaluating other potentially threatening organisms.

OSTP requests NASEM convene a meeting of experts, particularly world class geneticists, coronavirus experts, and evolutionary biologists, to assess what data, information, and samples are needed to address the unknowns, in order to understand the evolutionary origins of 2019-nCoV and more effectively respond to both the outbreak and any resulting misinformation. I request a letter statement from the National Academies be prepared and provided in response to this solicitation. A more in-depth examination of the issues will be established as a follow up as needed,” **Dr. Kelvin Droegemeier wrote in the letter.**

Please find the letter to Dr. McNutt attached.

Subsequently, the National Academies of Sciences, Engineering, and Medicine responded in a joint letter from Dr. Marcia McNutt, President of the National Academy of Sciences; Dr. John L. Anderson, President of the National Academy of Engineering; and Dr. Victor J. Dzau, President of the National Academy of Medicine.

“In response to your request, we consulted leading experts in the fields of virology, infectious disease genomics, genome sciences, epidemiology, microbiology, immunobiology, coronaviruses, emerging infections, biosecurity, and global health. We wanted their views about the data needs that could help elucidate the origin and evolution of 2019-nCoV.

“The National Academies stand ready to assemble a committee of experts to examine these issues in more detail and provide evidence-based advice to you in an expedited manner if requested. We appreciate your trust in the National Academies and our efforts to advise the nation and inform public policy decisions,” **the three presidents wrote in the letter.**

Please find the letter from NASEM presidents to Dr. Droegemeier attached.

Subject: Informal coronavirus teleconference

Dear colleagues,

On behalf of Mike Ryan, allow me to share with you the following background documents ahead of the informal coronavirus teleconference at 13.00 CET today:

- COVID-19 epidemiological update (19 Feb)
- COVID-19 EPI WIN update (19 Feb)
- COVID-19 slide deck, which has been presented at today's WHO Member States briefing
- Global Research Forum summary report
- China CDC research paper: The Epidemiological Characteristics of an Outbreak of 2019 Novel Coronavirus Diseases (COVID-19), 17 Feb

Any questions about the attached material is welcome during the call, however, please note, that the documents serve as background information ahead of the teleconference and will not be presented during the call.

In the interest of time, today's teleconference will start a few brief opening remarks, which will immediately be followed by a Q&A around the following questions:

(b) (5)

The dial in details are attached. If you experience any technical difficulties joining this conference call, please contact the WHO HQ EOC operator at: **+41 22 79 12 490**

Subject: RE: Availability to brief Ambassadors Thursday afternoon?

Good Morning Garrett and HHS Team,

If you would please let us know availability soonest, we would be very appreciative. We need to send invitations out to the Ambassadors very soon in order to confirm attendance.

Thank you!

Best,

Phil

Philip J. Ferro, PhD, MS

Subject: nCoV WHTF Documents and Deliverables for Review

Good Afternoon WHTF,

WHTF members have concurred with the proposed CONOP to repatriate American citizens from Japan.

Please find the following documents attached for consideration by the TF. If amenable to the group, we would propose discussion by the TF at a future date.

(b) (5)

Currently, there are no TF calls scheduled Saturday – Monday.

Best Regards,

Phil

Sir,

We realize how busy you and Dr. Fauci are right now, but we wanted to follow up regarding the establishment of a NASEM expert panel, plans for international expert engagement (isolate and sequence collection), and a continued focus with regard to evolutionary origin. As such, we would like to propose a call between yourself, Dr. Fauci, and Dr. Droegemeier to discuss what is needed for the U.S. response and preparedness efforts. I know Chris (b) (6), and we plan to sync with him later this afternoon.

If you are amenable, would a call at 1700 tomorrow, February 11, 2020 work? Patty?

THE WHITE HOUSE
Office of Science and Technology Policy
FOR IMMEDIATE RELEASE
February 7, 2020

**President Trump's Science Advisor and the National Academies of Sciences,
Engineering, and Medicine Commit to Collaborative Effort on the Coronavirus**
White House OSTP and NASEM to Gather Subject Matter Experts on Origination of 2019-nCov

Yesterday, Dr. Kelvin Droegemeier, Director of The White House Office of Science and Technology Policy (OSTP) sent a letter to Dr. Marcia McNutt, President of the National Academy of Sciences, calling for the National Academies of Sciences, Engineering, and Medicine (NASEM) to rapidly examine information and identify data requirements that would help determine the origins of 2019-nCoV.

"Although a widely-disputed paper, 'Uncanny similarity of unique inserts in the 2019-nCoV spike protein to HIV-1 gp120 and Hag,' posted on the pre-print server bioRxiv last week has been withdrawn, the response to that manuscript highlights the need to determine information and data requirements as quickly as possible to better perform and validate such analyses of origin. These questions are important not only for this current situation, but to inform future outbreak preparation and better understand animal/human and environmental transmission aspects of coronaviruses. As part of a broader deliberative process, this review will aid preparedness for future events by establishing a process that quickly assembles subject matter experts for evaluating other potentially threatening organisms.

OSTP requests NASEM convene a meeting of experts, particularly world class geneticists, coronavirus experts, and evolutionary biologists, to assess what data, information, and samples are needed to address the unknowns, in order to understand the evolutionary origins of 2019-nCoV and more effectively respond to both the outbreak and any resulting misinformation. I request a letter statement from the National Academies be prepared and provided in response to this solicitation. A more in-depth examination of the issues will be established as a follow up as needed," **Dr. Kelvin Droegemeier wrote in the letter.**

Please find the letter to Dr. McNutt attached.

Subsequently, the National Academies of Sciences, Engineering, and Medicine responded in a joint letter from Dr. Marcia McNutt, President of the National Academy of Sciences; Dr.

John L. Anderson, President of the National Academy of Engineering; and Dr. Victor J. Dzau, President of the National Academy of Medicine.

“In response to your request, we consulted leading experts in the fields of virology, infectious disease genomics, genome sciences, epidemiology, microbiology, immunobiology, coronaviruses, emerging infections, biosecurity, and global health. We wanted their views about the data needs that could help elucidate the origin and evolution of 2019-nCoV.

“The National Academies stand ready to assemble a committee of experts to examine these issues in more detail and provide evidence-based advice to you in an expedited manner if requested. We appreciate your trust in the National Academies and our efforts to advise the nation and inform public policy decisions,” **the three presidents wrote in the letter.**

Please find the letter from NASEM presidents to Dr. Droegemeier attached.

<https://www.sciencemag.org/news/2020/02/paper-non-symptomatic-patient-transmitting-coronavirus-wrong>

Study claiming new coronavirus can be transmitted by people without symptoms was flawed

By [Kai Kupferschmidt](#) Feb. 3, 2020 , 5:30 PM

A [paper published on 30 January](#) in *The New England Journal of Medicine (NEJM)* about the first four people in Germany infected with a novel coronavirus made many headlines because it seemed to confirm what public health experts feared: that someone who has no symptoms from infection with the virus, named 2019-nCoV, can still transmit it to others. That might make controlling the virus much harder.

Chinese researchers had previously suggested asymptomatic people might transmit the virus but had not presented clear-cut evidence. "There's no doubt after reading [the *NEJM*] paper that asymptomatic transmission is occurring," Anthony Fauci, director of the U.S. National Institute of Allergy and Infectious Diseases, told journalists. "This study lays the question to rest."

But now, it turns out that information was wrong. The Robert Koch Institute (RKI), the German government's public health agency, has written a letter to *NEJM* to set the record straight, even though it was not involved in the paper.

The letter in *NEJM* described a cluster of infections that began after a businesswoman from Shanghai visited a company near Munich on 20 and 21 January, where she had a meeting with the first of four people who later fell ill. Crucially, she wasn't sick at the

time: “During her stay, she had been well with no sign or symptoms of infection but had become ill on her flight back to China,” the authors wrote. “The fact that asymptomatic persons are potential sources of 2019-nCoV infection may warrant a reassessment of transmission dynamics of the current outbreak.”

But the researchers didn’t actually speak to the woman before they published the paper. The last author, Michael Hoelscher of the Ludwig Maximilian University of Munich Medical Center, says the paper relied on information from the four other patients: “They told us that the patient from China did not appear to have any symptoms.” Afterward, however, RKI and the Health and Food Safety Authority of the state of Bavaria did talk to the Shanghai patient on the phone, and it turned out she did have symptoms while in Germany. According to people familiar with the call, she felt tired, suffered from muscle pain, and took paracetamol, a fever-lowering medication. (An RKI spokesperson would only confirm to *Science* that the woman had symptoms.)

Hoelscher was not on the call, he says. “I asked the Bavarian Health and Food Safety Authority whether the information from that phone conversation called for a correction and I was told that is not the case,” he says. (The Bavarian ministry of health, of which the agency is part, has not responded to a request for information from *ScienceInsider*.) But RKI disagreed. The agency’s spokesperson confirms that a letter about the error has been submitted to *NEJM*. RKI also informed the World Health Organization (WHO) and European partner agencies about the new information.

“I feel bad about how this went, but I don’t think anybody is at fault here,” says virologist Christian Drosten of the Charité University Hospital in Berlin, who did the lab work for the study and is one of its authors. “Apparently the woman could not be reached at first and people felt this had to be communicated quickly.”

Marc Lipsitch, an epidemiologist at the Harvard T.H. Chan School of Public Health, says calling a case asymptomatic without talking to the person is problematic. “In retrospect, it sounds like this was a poor choice,” he says. However, “In an emergency setting, it’s often not possible to talk to all the people,” he adds. “I’m assuming that this was an overstretched group trying to get out their best idea of what the truth was quickly rather than somebody trying to be careless.”

The Public Health Agency of Sweden reacted less charitably. “The sources that claimed that the coronavirus would infect during the incubation period lack scientific support for this analysis in their articles,” says a document with frequently asked questions [the agency posted on its website yesterday](#). “This applies, among other things, to an article in [*NEJM*] that has subsequently proven to contain major flaws and errors.” Even if the patient’s symptoms were unspecific, it wasn’t an asymptomatic infection, says Isaac Bogoch, an infectious disease specialist at the University of Toronto. “Asymptomatic means no symptoms, zero. It means you feel fine. We have to be careful with our words.”

Hoelscher agrees that the paper should have been clearer about the origin of the information about the woman’s health. “If I was writing this today, I would phrase that

differently," he says. The need to share information as fast as possible, along with *NEJM*'s push to publish early, created a lot of pressure, he says.

Given how fast data are coming out amid the growing global crisis, it's good to read even peer-reviewed papers with some extra caution at the moment, Lipsitch says: "I think peer review is lighter in the middle of an epidemic than it is at normal speed, and also the quality of the data going into the papers is necessarily more uncertain."

The fact that the paper got it wrong doesn't mean transmission from asymptomatic people doesn't occur. Fauci, for one, still believes it does. "This evening I telephoned one of my colleagues in China who is a highly respected infectious diseases scientist and health official," he says. "He said that he is convinced that there is asymptomatic infection and that some asymptomatic people are transmitting infection." But even if they do, asymptomatic transmission likely plays a minor role in the epidemic overall, WHO says. People who cough or sneeze are more likely to spread the virus, the agency wrote in a situation report on Saturday. "More data may come out soon. We will just have to wait," Lipsitch says.

The German cluster does reveal another interesting aspect about the new virus, Drosten says. So far most attention has gone to patients who get seriously ill, but all four cases in Germany had a very mild infection. That may be true for many more patients, Drosten says, which may help the virus spread. "There is increasingly the sense that patients may just experience mild cold symptoms, while already shedding the virus," he says. "Those are not symptoms that lead people to stay at home."

HHS (Larry and Jose) and CDC colleagues (Nathalie, Joe, and Kristie) – State is working on a cable to send to our missions tomorrow afternoon with guidance on the coronavirus and public health declaration. Attached is a very rough draft. Could you please send input and clearance for HHS and CDC as soon as possible tomorrow morning?

Apologies for the short fuse, and please let me know if you have questions. We want our missions to have this by mid-day Sunday so they are prepared for questions Monday morning their time. We plan to turn this into a Department Notice for all domestic State Department staff as well.

Keith and Dr. Fauci,

Appreciate your time and consideration. Mr. Greenberg, Dr. Robert Hariri of Celularity, and I spoke by phone with State Dept Counselor Ulrich Brechbuhl today at Secretary Pompeo's request. Dr. Hariri forward detailed information to the Counselor about the treatment he believes could address the coronavirus outbreak. I believe that material is being circulated to the appropriate parties in the USG. Dr. Fauci, I would be happy to get them directly to you from Dr. Hariri and could even put you in direct touch with him.

Thanks Norm!

Many thanks again and best regards,

Joe

Norm and Joe,

Thank you for reaching out about this opportunity. The Department of State is not directly engaged on the vaccine front but we wanted to point you in the right direction. With this message, I am connecting you with Dr. Anthony Fauci, Director of the NIH's National

Institute of Allergy and Infectious Diseases. He has been a reliable voice and authority for the U.S. government on the coronavirus emergency.

Dr. Fauci,

I hope you don't mind that I am sending this to you directly. While we have not yet had an opportunity to meet, in my short time here as Under Secretary many of my State Department colleagues have expressed admiration for your work at NIH, particularly your groundbreaking efforts on the PEPFAR initiative.

Hank Greenberg is the former CEO of AIG and the current chairman of Starr Companies, as well as a long-time contact of Secretary Pompeo. Could you please direct Norm and Joe to the appropriate point of contact at NIH regarding their potential vaccine?

With gratitude,
Keith

Thanks Norm.

Keith, nice to meet you. Mr. Greenberg and the Secretary are good friends of many years. He's like to connect with the Secretary by phone to inform him of this important opp. Impt for public health and impt for bilateral relations.

I know the Secretary is traveling. Perhaps we could talk in the morning about facilitating a call.

Many thanks,

Joe

Hank Greenberg who has funded millions in medical research through his Starr Foundation was approached by a researcher today with a convincing case that he has a vaccine for the virus. The Chinese consul in New York is very supportive.

I am copying Joe Dillon on this note, my friend who is Starr's EVP for Government Relations. Joe will provide more detail.

How can we move this forward quickly?

FOR IMMEDIATE RELEASE

Friday, January 31, 2020

Secretary Azar Delivers Remarks on Declaration of Public Health Emergency for 2019 Novel Coronavirus

As Prepared for Delivery

Good afternoon, I am Alex Azar, Secretary of Health and Human Services, and Chairman of the President's task force on novel coronavirus.

I will start by turning it over to Dr. Robert Redfield, Director of the Centers for Disease Control and Prevention, to discuss the current situation on the novel coronavirus.

[Redfield briefs.]

I now invite Dr. Anthony Fauci, Director of the National Institute of Allergy and Infectious Diseases, to discuss the underlying rationale for today's actions.

[Fauci briefs.]

Today, President Trump took decisive action to minimize the risk of the spread of the coronavirus in the United States.

Since taking office, President Trump has been clear: His top priority is the safety of the American people.

In addition to the steps that the doctors have outlined, we continue to operationalize a multi-layered, cross-agency public health response.

Following the World Health Organization's decision to declare the 2019 novel coronavirus a Public Health Emergency of International Concern, I have declared today that the

coronavirus presents a Public Health Emergency in the United States.

The actions we have taken and continue to take complement the work of China and the WHO to contain the outbreak within China.

In accordance with the declaration, beginning 5 PM Eastern Standard Time, Sunday, February 2, the U.S. government will implement temporary measures to increase our abilities to detect and contain the coronavirus proactively and aggressively.

Any U.S. citizen returning to the U.S. who has been in Hubei Province in the previous 14 days will be subject to up to 14 days of mandatory quarantine, to ensure they're provided proper medical care and health screening. To be clear, this applies only to U.S. citizens who have been in Hubei Province in the past 14 days.

Any U.S. citizen returning to the U.S. who has been in the rest of mainland China within the previous 14 days will undergo proactive entry health screening at a select number of ports of entry and up to 14 days of monitored self-quarantine to ensure they have not contracted the virus and do not pose a public health risk.

Additionally, the President has signed a Presidential Proclamation, using his authority pursuant to Section 212(f) of the Immigration and National Act, temporarily suspending the entry into the United States of foreign nationals who pose a risk of transmitting the 2019 novel coronavirus.

As a result, foreign nationals, other than immediate family of U.S. citizens and permanent residents, who have traveled to China within the last 14 days will be denied entry into the U.S. for this time.

Once again, these actions will become effective at 5 PM EST, Sunday, February 2.

These prudent and targeted actions will decrease the pressure on public health officials screening incoming travelers, expedite the processing of U.S. citizens returning from China, and ensure resources are focused on the health and safety of the American people.

I want to stress: The risk of infection for Americans remains low, and with these and our previous actions, we are working to keep the risk low.

All agencies are working aggressively to monitor this continuously evolving situation and to keep the public informed.

The United States appreciates China's efforts and coordination with public health officials across the globe and continues to encourage the highest levels of transparency.

It is likely that we will continue to see more cases in the United States in the coming days and weeks, including some limited person-to-person transmission.

The American public can be assured: The full weight of the U.S. government is working to safeguard the health and safety of the American people.

I now invite Deputy Secretary of State Steve Biegun for an update.
