ACKNOWLEDGMENTS

The *Statistical Abstract of the United States* was prepared under the direction of Edwin D. Goldfield, Chief, Statistical Reports Division. Compilation was under the supervision of William Lerner, Assistant Chief, assisted by Dorothy M. Belzer for editorial supervision and Charles S. James, Jr., for planning and review.

The cooperation of the many contributors to this volume is gratefully acknowledged. The list of sources of tables (pp. 953-956) and the source note below each table credit the various government and private agencies which have collaborated in furnishing information for the *Statistical Abstract*.

JUNE 1961.

Library of Congress Card No. 4-18089

SUGGESTED CITATION

U.S. Bureau of the Census, *Statistical Abstract of the United States: 1961*. (Eighty-second edition.) Washington, D.C., 1961.

P R E F A C E

The *Statistical Abstract of the United States*, published annually since 1878, is the standard summary of statistics on the social, political, and economic organization of the United States. It is designed to fulfill two functions: First, to serve as a convenient volume for statistical reference; and second, to serve as a guide to other statistical publications and sources. The latter function is served by the introductory text to each section, the source notes appearing below each table, and the Bibliography of Sources (page 957).

This volume includes a selection of data from many important statistical publications, both governmental and private. The publications cited as sources usually contain additional statistical detail and a more complete discussion of relevant definitions and concepts than can be presented here. Where contributing agencies are cited as sources, without mention of publications, more detailed information frequently is available from their unpublished tabulations and records.

Emphasis in the *Statistical Abstract* is given primarily to national data. Data for regions and individual States are presented to a lesser extent. Statistics for outlying areas of the United States are included in the State tables whenever available and supplemented by specialized information for these areas in section 33. Statistics for cities or other relatively small geographic units appear only in a few instances.

Wherever possible, statistics shown for the United States represent the 50 States and the District of Columbia. Figures for Alaska and Hawaii are presented separately in State tables, and are also included in United States summary tables, whenever such figures are available. Statements specifying inclusion or exclusion of the figures for Alaska and Hawaii appear in the headnotes to each table unless the inclusion or exclusion is self-evident. Data for Alaska and Hawaii are no longer presented in section 33, "Outlying Areas. . ."

Changes in the 1961 edition.—This edition, the 82d annual issue, presents data for the most recent year or period available during the early part of 1961.

Each year, in addition to the normal bringing up to date of the over 1,200 tables and charts included, new tables of current interest are introduced. Data that are less timely are eliminated and format and text changes are made where considered advisable.

Special efforts were made in this edition to include new data from the 1960 Censuses of Population and Housing and the 1959 Census of Agriculture insofar as they were available by printing time. The sections thereby affected were Population, Construction and Housing, Agriculture (both sections), and Irrigation and Drainage. A more complete selection of statistics from decennial census reports covering these and other subjects will appear in the 1962 edition of the *Abstract*.

Some changes were also introduced in the Distribution and Services section and the Manufactures section as a result of the availability of final figures from the 1958 Censuses of Business and Manufactures and Mineral Industries.

The presentation of data on public welfare subjects was significantly increased by additions to the health and medical care subsections and to the Education, Social Insurance, and Prices sections. Eight new tables were added to the medical care group—five from the National Health Survey, showing information on dental visits, prevalence of acute and chronic conditions, utilization of health services, and persons requiring home care; two from the Bureau of Old-Age and Survivors Insurance, presenting data on medical care costs for the aged and how these costs are met; and one from the Bureau of Labor Statistics showing indexes of medical care prices. Six new tables were added to the Education section showing annual and lifetime income

by years of school completed, school enrollment projections, and early employment experience of school-leavers. The Social Insurance section includes five new tables on average payments to beneficiaries under social security programs, contribution rates of employees and employers, corporate contributions to employee benefit plans, and expenditures and grants of private foundations. Two new tables in the Prices section show annual costs of a city worker's family budget and a retired couple's budget.

The scientific research and development material was revised and several tables were added, including data on basic research and transfer of research and development funds among sectors of the economy. Several new tables were also introduced in the Construction and Housing section, including expenditures for residential alterations and repairs and a summary of the urban renewal program and the urban planning assistance program.

Following is a list of some of the subjects covered by the 66 new tables:

Population mobility (p. 34)	Subsidy programs of the Federal Government (pp. 371-372)
Plural births (p. 54)	Research and development (pp. 534-535, 537)
Medical care price indexes (p. 72)	Industrial and commercial failures (pp. 662-663)
Health and medical costs for the aged (pp. 83-84)	Seafoods and manufactured fishery products (p. 708)
Migratory agricultural workers (p. 96)	Residential alterations and repairs (p. 751)
Projections of school enrollment (p. 108)	Mobile homes (p. 760)
Education and income (pp. 110-111)	Urban renewal (pp. 772-773)
Outdoor recreation areas (p. 193)	Gold flow and short-term liabilities to foreigners (p. 868)
Unemployment (p. 205)	Mining and manufacturing indexes for geographic areas of the world (p. 925)
Defense expenditures, by States (p. 238)	Inter-American Development Bank (p. 944)
Fringe benefit costs (pp. 273, 788)	
Expenditures and grants of foundations (p. 295)	
City worker's family budget (pp. 337-338)	
Federal budget projections (p. 370)	

Among the tables shown in the last edition, 49 were omitted from this issue. Major omissions occurred in the Population section affecting population estimates and characteristics data not yet adjusted to the 1960 Census figures or not yet available from the 1960 Census, such as citizenship, nativity, and mobility status; in the Social Insurance and Welfare Services section affecting financial characteristics of old-age and survivors insurance beneficiaries, unemployment insurance coverage by industry, activities of public employment offices, and expenditures of religious and private welfare organizations; in the Agriculture—General Statistics section affecting data on mortgaged farms and a special study on farm expenditures; in the section on Construction and Housing involving primarily statistics from the 1956 National Housing Inventory; and in the section on Outlying Areas Under the Jurisdiction of the United States affecting data for Alaska and Hawaii, most of which have been included in the State tables in other sections.

Supplements to the Abstract.—The *Statistical Abstract*, as an annual one-volume publication, is of necessity limited in amount of detail shown. To meet the need for more detailed information for small areas (cities, counties, metropolitan areas, and others) and for more historical data, a series of supplements to the *Abstract* has been issued.

The *Congressional District Data Book (Districts of the 87th Congress)*, issued in June 1961, is the first report of its type to be published by the Bureau of the Census. Based primarily on data from the most recent censuses, it presents 135 items on population, housing, and elections for all 437 congressional districts as constituted in 1960; 72 similar items pertaining to nonwhite population for selected districts; and 125 items on economic subjects for the 297 districts whose boundaries follow county lines.

This report is on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D.C., for \$1.00 per copy (soft cover).

Historical Statistics of the United States, Colonial Times to 1957, is a completely revised and expanded version of *Historical Statistics of the United States, 1789-1945*, which was issued in 1949. Compiled by the Bureau of the Census with the cooperation of the Social Science Research Council, this supplement presents in compact and convenient form more than 8,000 statistical time series (mostly on an annual basis) which cover periods from 1610 to 1957. The new volume includes historical data on every major aspect of the nation's social and economic development and consists of 24 chapters and 51 sections. The statistics are accompanied by text notes which specify the sources of the data, include references to other sources, discuss the historical development of the data and evaluate their reliability, and present definitions of technical terms. Also included is a separate chapter on colonial statistics and a 15-page subject index.

The volume is on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D.C., for \$6.00 per copy (buckram).

The *County and City Data Book, 1956*, is designed to help satisfy the need for statistical information about counties and cities and other relatively small geographic areas. Conveniently assembled are 133 statistical items for each county in the United States and 130 statistical items for each of the 484 cities having 25,000 inhabitants or more in 1950. Information comparable to that for counties is also presented for geographic regions and divisions, States, and standard metropolitan areas. Also included are descriptive text and source notes.

This edition is the fifth in the *County and City Data Book* series. Many of the statistics in this volume were obtained from the results of the 1954 Censuses of Agriculture, Business, and Manufactures. Other subjects covered include births, deaths, and marriages; population characteristics; dwelling units; city government finances and employment; hospitals; bank deposits; and other items of social and economic importance. This volume is on sale by the Superintendent of Documents, Government Printing Office, Washington 25, D.C., for \$4.50 (buckram).

Responsibility.—The contents of this volume are taken from a large number of sources (see Source Agencies and Table Numbers, pp. 953-956). The Bureau of the Census cannot accept the responsibility for the accuracy or limitations of the data presented here, other than for those which it collects. However, the responsibility for selection of the material and for proper presentation rests with the Bureau.

SUGGESTIONS AND COMMENTS

Many persons have written offering suggestions for improving the presentation of the material. These letters have been most helpful and users are urged to continue to make their needs known. All suggestions will be carefully considered in planning future editions. Suggestions and comments should be sent to the Director, Bureau of the Census, Washington 25, D.C.

FOR ADDITIONAL INFORMATION ON DATA PRESENTED

write to the agency indicated in the source note to the table which covers the desired subject.

STATISTICAL ABSTRACT SUPPLEMENTS

Congressional District Data Book (Districts of the 87th Congress).

A handy reference consisting of 135 statistical items for all 437 congressional districts as constituted in 1960; 72 items pertaining to nonwhite population for selected districts; and 125 items for the 297 districts whose boundaries follow county lines. Based largely on results of the most recent censuses. Includes text and source notes. 176 pages. Issued 1961. Price \$1.00 (soft cover).

Historical Statistics of the United States, Colonial Times to

1957. Prepared with the cooperation of the Social Science Research Council. A compilation of more than 8,000 statistical time series, largely annual, on American social and economic development covering periods from 1610 to 1957. Includes definitions of terms and descriptive text. Specific source notes provide a basic guide to original published sources for further reference and additional data. Detailed alphabetical subject index. 801 pages. Issued 1960. Price \$6.00 (buckram).

County and City Data Book, 1956. A compact presentation

of 133 items of statistical data for each county in the United States, and 130 items of statistical data for each of 484 cities having 25,000 inhabitants or more in 1950. Information comparable to that for counties is also presented for geographic regions and divisions, States, and standard metropolitan areas. Items included based largely on results of 1954 Censuses of Agriculture, Business, and Manufactures. Includes 51 maps, explanatory and definitive text, and source notes. Issued 1957. Price \$4.50 (buckram).

Purchase orders should be addressed to the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

FIG. I. MAP OF THE UNITED STATES, SHOWING CENSUS REGIONS AND DIVISIONS

[Alaska and Hawaii are drawn at different scales from contiguous United States and are not shown in their correct relative geographic positions]

Source: Department of Commerce, Bureau of the Census.

Section 1

Population

This section relates to the population of the United States, its distribution, and its characteristics. The principal source of these data is the Decennial Census of Population, a house-to-house enumeration made by the Bureau of the Census. In accordance with a Constitutional provision for a decennial canvass of the population, the first census enumeration was made in 1790. The primary reason for the Census of Population, as set forth in the Constitution, was to provide a basis for the apportionment of Members of the House of Representatives among the several States. Until 1902, the census organization was temporary. The Bureau of the Census was then established as a permanent agency of the Government charged with responsibility for the decennial census and for compiling statistics on other subjects as needed. Currently, this Bureau supplies intercensal data based on surveys and estimates in addition to making the comprehensive decennial census enumeration.

Decennial censuses.—In accordance with census practice dating back to 1790, each person enumerated in the 1960 Census was counted as an inhabitant of his usual place of residence or usual place of abode, which is generally construed to mean the place where he lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile; however, in most cases, the use of these different bases of classification would produce substantially the same statistics, although there may be appreciable differences for a few areas.

For the 1960 Census, only data based on complete counts are presented in this edition. For the 1950 Census, certain of the data are indicated as being obtained from representative samples of 20 percent or less of the population. A few tables also include 1940 data obtained on a sample basis.

Exact agreement is not to be expected among the various samples, nor between them and the complete census count, but the sample data may be used with confidence where large numbers are involved, and may be assumed to indicate patterns and relationships where small numbers are involved. Detailed statements regarding the sampling errors are given in the original sources.

Current Population Survey.—Several tables present statistics based on the Current Population Survey, conducted monthly by the Bureau of the Census. Until May 1956, the Survey covered a sample of approximately 21,000 interviewed households spread over a sample of areas throughout the United States. Since then, the sample has been expanded to approximately 35,000 interviewed households in a larger number of areas. For a discussion of the reliability of estimates based on this sample, see Technical Note, page 201.

Population estimates.—Population estimates for dates after April 1950, which are not the result of sample surveys, are based on data from the 1950 and 1960 Censuses; statistics of births and deaths provided by the National Office of Vital Statistics, Public Health Service; statistics of immigration and emigration reported by the Immigration and Naturalization Service, Department of Justice; and statistics on the Armed Forces provided by the Department of Defense. Estimates of State population are based on the same types of data and also make use of school statistics provided by State Departments of Education and parochial school systems throughout the country.

Urban and rural areas.—According to the definition adopted for use in the 1960 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, villages, and towns (except towns in New England, New York, and Wisconsin); (b) the densely settled urban fringe, whether incorporated or unincorporated, of urbanized areas; (c) towns in New England and townships in New Jersey and Pennsylvania which contain no incorporated municipalities as subdivisions and have either 25,000 inhabitants or more or a population of 2,500 to 25,000 and a density of 1,500 persons or more per square mile; (d)

counties in States other than the New England States, New Jersey, and Pennsylvania that have no incorporated municipalities within their boundaries and have a density of 1,500 persons or more per square mile; and (e) unincorporated places of 2,500 inhabitants or more.

This definition of urban is substantially the same as that used in 1950; the major difference between 1950 and 1960 is the designation in 1960 of urban towns in New England and of urban townships in New Jersey and Pennsylvania. In censuses prior to 1950, the urban population comprised all persons living in incorporated places of 2,500 inhabitants or more and areas (usually minor civil divisions) classified as urban under somewhat different special rules relating to population size and density.

In all definitions, the population not classified as urban constitutes the rural population. The term "current urban definition" refers to the population classified in accordance with the definitions used in 1950 and 1960. The term "previous urban definition" refers to the definition used prior to 1950.

A number of large and densely settled places are not included as urban because they are not incorporated places. To improve its measure of the urban population, the Bureau of the Census adopted, in 1950, the concept of the urbanized area and delineated, in advance of enumeration, boundaries for unincorporated places. All the population residing in urban-fringe areas and in unincorporated places of 2,500 or more is classified as urban according to the "current" definition.

Farm and nonfarm residence.—The rural population is divided into the rural-farm population, which comprises all residents living on farms, and the rural-nonfarm population, which comprises the remaining rural population. According to the definition used in the 1960 Census, the farm population consists of all persons living in rural territory on places of less than 10 acres yielding agricultural products which sold for \$250 or more in the previous year, or on places of 10 acres or more yielding agricultural products which sold for \$50 or more in the previous year. In the 1950 Census, farm population was determined by answers to the question, "Is this house on a farm (or ranch)?" However, persons on "farms" who paid cash rent for a house and yard only were classified as nonfarm. In both the 1950 and the 1960 Census, rural persons in institutions, motels, and tourist camps were classified as nonfarm.

Color and race.—The concept of race as it has been used by the Bureau of the Census is derived from that which is commonly accepted by the general public. It does not, therefore, reflect clear-cut definitions of biological stocks, and several categories used obviously refer to nationality. "Color" divides the population into two groups, white and nonwhite. The nonwhite population consists of Negroes, American Indians, Japanese, Chinese, Filipinos, and all other groups not classified as white. Persons of Mexican birth or ancestry who are not definitely Indian or of other nonwhite stock are included in the white population. Persons of mixed parentage are placed in the race or color classification of the nonwhite parent.

Beginning with the 1960 Census, however, information regarding color and race was obtained by self-enumeration or self-reporting, whereas formerly race and color classification was obtained in most cases by the Census enumerator's observation.

Household.—A "household," according to present usage of the Census Bureau, comprises all persons who occupy a "housing unit," that is, a house, an apartment or other group of rooms, or a room that constitutes "separate living quarters." A household includes the "related persons" (the head of the household and others in the housing unit who are related to the head) and also the lodgers and employees, if any, who regularly live in the house. A person living alone or a group of unrelated persons sharing the same housing unit as partners is also counted as a household.

Prior to 1960 a household was defined as all the persons occupying a "dwelling unit." See section 29, Construction and Housing, for definitions of "housing unit" and "dwelling unit."

Group quarters are living arrangements for persons who do not live in housing units.

Examples of group quarters are: A house with at least 5 lodgers, an institution, a college dormitory, or a military barracks.

Family.—The term "family," as used here, refers to a group of two or more persons related by blood, marriage, or adoption and residing together, and differs from the meaning of the term as used in the 1930 and 1940 Censuses. A primary family consists of the head of a household and all (one or more) other persons in the household related to the head. A secondary family comprises two or more persons such as guests, lodgers, or resident employees and their relatives, living in a household or group quarters (other than the negligible number of such groups among inmates of institutions) and related to each other.

Subfamily.—A subfamily is a married couple with or without children, or one parent with one or more children under 18 years old, living in a household and related to, but not including, the head of the household or his wife. Members of a subfamily are also members of the primary family with which they live. The number of subfamilies, therefore, is not included in the number of families.

Married couple.—A married couple is defined as a husband and his wife living together, with or without children and other relatives.

Unrelated individuals.—"Unrelated individuals" refer to persons (other than inmates of institutions) who are not living with any relatives. A primary individual is a household head living alone or with persons all of whom are unrelated to him. A secondary individual is a person in a household or group quarters such as a guest, lodger, or resident employee (excluding inmates of institutions) who is not related to the head or to any other person in the household or group quarters.

Alaska and Hawaii.—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957*, series A 17-21") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

Population

No. 3. PROJECTIONS OF THE TOTAL POPULATION, BY AGE AND SEX: 1965 TO 1980

[In thousands. As of July 1. Excludes civilian population of Alaska and Hawaii. Includes Armed Forces abroad. Projections based on current estimates for 1957; they do not take account of the 1960 Census results. Series I, II, III, and IV imply the following assumptions as to fertility: I—fertility averages 10 percent above 1955-57 level throughout projection period; II—1955-57 level continues to 1975-80; III—1955-57 level declines to 1949-51 level by 1965-70, then remains at that level to 1975-80; IV—1955-57 level declines to 1942-44 level by 1965-70, then remains at that level to 1975-80. Series I illustrates the size of the future population under *very high* fertility conditions; it is unlikely that the fertility level implied will persist throughout the projection period.]

FEMALE

¹ Figures represent survivors of births of the appropriate years and were used as the base for the projections of 5-to-9 year olds for later years. Figures in the second column (under 5 years) are comparable to 1950 Census counts of children under 5 years of age. They were obtained by subtracting approximately 802,000 (estimated "net census under-count" of children under 5 years) from the "adjusted" figures in order to make them comparable to 1950 Census counts. A more detailed discussion of this point is given in Bureau of the Census, *Current Population Reports*, Series P-25, Nos. 193 and 212. Source: Department of Commerce, Bureau of the Census; *Current Population Reports*, Series P-25, No. 187.

NO. 4. POPULATION AND AREA OF THE UNITED STATES AND OUTLYING AREAS:
1940 TO 1960

[For area figures of individual States, see table 212. See also *Historical Statistics, Colonial Times to 1957*, series A 4-16 and J2]

¹ Includes estimated population of the Philippine Islands (16,356,000), not shown separately.

² Census taken as of Oct. 1, 1939.

³ Puerto Rico was ceded to the United States by Spain in 1898. On July 25, 1952, pursuant to acts of Congress, it achieved the political status of the Commonwealth of Puerto Rico.

⁴ Enderbury Island uninhabited at time of enumeration.

⁵ Sand Island uninhabited at time of enumeration.

⁶ Less than 0.5 square mile.

⁷ Not enumerated.

⁸ Little Swan Island uninhabited at time of enumeration.

⁹ Includes Caroline, Christmas, Danger (Pukapuka), Flint, Funafuti, Kingman Reef, Malden, Manahiki, Navassa, Nukufetau, Nukulailai, Nurakita, Palmyra, Penrhyn, Rakahanga, Starbuck, Vostok, Phoenix Group (except Canton and Enderbury), and Union (Tokelau) Group, not enumerated in decennial censuses; and Baker, Howland, and Jarvis Islands not inhabited in 1950 and 1960. Quita Sueño Bank, Roncador Cay, and Serrana Bank, claimed by both the United States and Colombia, not enumerated.

¹⁰ Population of Baker, Howland, and Jarvis Islands. Other islands not enumerated or uninhabited at time of enumeration.

¹¹ Not enumerated or uninhabited at time of enumeration.

¹² Area is for Navassa (2 square miles), Baker, Howland, and Jarvis (combined area 3 square miles), and Palmyra (4 square miles). Excludes Kingman Reef, Quita Sueño Bank, Roncador Cay, and Serrana Bank (each less than 0.5 square miles); area of other islands listed in footnote 9 not available.

¹³ Under jurisdiction of United States in accordance with treaty of Nov. 18, 1903, with Republic of Panama.

¹⁴ Leased (1914) from the Republic of Nicaragua for 99 years.

¹⁵ Figures from Government of Nicaragua. Little Corn Island uninhabited at time of enumeration.

¹⁶ Under the United Nations Trusteeship System with the United States as administering authority since July 18, 1947.

¹⁷ Population 1940, 131,258 (Census of Japan).

¹⁸ U.S. Department of the Navy. *Report on the Administration of the Trust Territory of the Pacific Islands for the Period July 1, 1949, to June 30, 1950*, U.S. Government Printing Office, Washington, D.C., 1950.

¹⁹ Census of 1958 conducted by the Office of the High Commissioner. See *Census Report, 1958: Trust Territory of the Pacific Islands*, Office of the High Commissioner, Agaña, Guam, June 1959.

²⁰ See references in footnotes 18 and 19, above. Comprised of land area 687 square miles and water area 7,797 square miles.

²¹ Excludes United States citizens temporarily abroad on private business, travel, etc. Such persons were enumerated in the United States at their usual place of residence as absent members of households.

²² Excludes dependents of Federal employees and crews of merchant vessels.

²³ Based on 20-percent sample of reports received.

²⁴ Not available.

²⁵ Represents U.S. citizens abroad for extended periods of time. Since this population was enumerated on a voluntary basis, its coverage is probably less complete than that of other categories of Americans abroad.

Center of Population

No. 5. CENTER OF POPULATION: 1790 TO 1960

["Center of population" is that point which may be considered as center of population gravity of the U. S. or that point upon which the U. S. would balance, if it were a rigid plane without weight and the population distributed thereon with each individual being assumed to have equal weight and to exert an influence on a central point proportional to his distance from the point]

YEAR	North latitude	West longitude	Approximate location
CONTERMINOUS U.S.¹			
1790.....	39 16 30	76 11 12	23 miles east of Baltimore, Md.
1800.....	39 16 6	76 56 30	18 miles west of Baltimore, Md.
1810.....	39 11 30	77 37 12	40 miles northwest by west of Washington, D. C. (in Virginia).

1950.....	2,520	2,163	3,627	1,464	350	1950-60 avg. --	42,882	2,513	4,080	1,567	300
1951.....	2,718	2,329	3,820	1,497	379						

¹ Includes changes due to admissions into, and discharges from, Armed Forces abroad, for which figures are not shown separately.

² Adjusted for underregistration.

³ Adjusted for underregistration of infant deaths; includes estimates of deaths in Armed Forces abroad.

⁴ Incorporates the addition of the civilian population of Alaska in January 1959 and Hawaii in September 1959 to the total including Armed Forces abroad.

⁵ Provisional estimates.

² For United States, population of U.S. has been divided by total land area. For each State and Puerto Rico, population at given census has been divided by land area as then constituted. However, 1930 figures are based on revised land areas used for 1940. Alaska and Hawaii figures based on 1940 measurement of gross area.

³ Less than 0.1 percent.

Population

No. 10. POPULATION OF STANDARD METROPOLITAN STATISTICAL AREAS: 1960

(Minus sign (-) denotes decrease; percent increase based on areas as defined in 1960. A standard metropolitan statistical area is a county or group of contiguous counties (except in New England) which contains at least one city of 50,000 inhabitants or more or "twin cities" with a combined population of at least 50,000. In addition to the county, or counties, containing such a city or cities, contiguous counties are included in a standard metropolitan statistical area if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, towns and cities are the units used in defining standard metropolitan statistical areas. This list of areas is based on *Standard Metropolitan Statistical Areas, 1961*, issued by the Executive Office of the President, Bureau of the Budget.)

No. 14. POPULATION OF CITIES HAVING 100,000 INHABITANTS OR MORE IN 1960,
1910 TO 1960, AND AREA, 1960

[Increase from census to census includes that due to annexation of territory as well as to direct growth. "Cities" refers to political subdivisions which are incorporated as cities, boroughs, towns, or villages with the exception that towns are not recognized as incorporated places in New England States, New York, and Wisconsin.]

No. 19. POPULATION, BY AGE AND SEX, 1930 TO 1960, AND BY COLOR, 1950 AND 1960

[In thousands. Beginning 1960, includes Alaska and Hawaii. The median is the value which divides the distribution into two equal parts—one-half of the cases falling below this value and one-half exceeding this value. See also *Historical Statistics, Colonial Times to 1857*, series A 71-94]

No. 30. HOUSEHOLDS, BY RACE OF HEAD, WITH POPULATION PER HOUSEHOLD: 1890 TO 1960

[In thousands. Beginning 1960, includes Alaska and Hawaii. For definition of household, see p. 2. See also *Historical Statistics, Colonial Times to 1957*, series A 242 and A 255-263]

DATE	HOUSEHOLDS				RACE OF HEAD			
	Number	Annual increase over preceding date		Population per household ²	White	Negro	Other	Percent white
		Number	Percent ¹					
1890 (June 1) ³	12,690	-----	-----	4.93	11,255	1,411	24	88.7
1900 (June 1).....	15,964	327	2.32	4.76	14,064	1,834	66	88.1
1910 (Apr. 15) ⁴	20,256	434	2.44	4.54	18,002	2,173	481	89.9
1920 (Jan. 1) ⁵	24,352	418	1.90	4.34	21,826	2,431	95	89.6
1930 (Apr. 1).....	29,905	542	2.02	4.11	26,983	2,804	118	90.2
1940 (Apr. 1).....	34,949	504	1.56	3.77	31,680	3,142	127	90.6
1950 (Apr. 1).....	42,857	791	2.06	3.53	39,044	3,633	149	91.2
1960 (Apr. 1).....	53,021	1,016	1.92	3.38	47,868	5,153	-----	90.3

¹ Computed by compound interest formula.

² Obtained by dividing total population by number of households; hence, not strictly average size of household because total population includes members of quasi-households.

³ Includes small number of hotels, institutions, and other quasi-households.

⁴ Estimated.

Source: Department of Commerce, Bureau of the Census; Reports of the Thirteenth, Fifteenth, Sixteenth, Seventeenth, and Eighteenth Censuses, and records.

No. 31. HOUSEHOLDS, FAMILIES, SUBFAMILIES, MARRIED COUPLES, AND UNRELATED INDIVIDUALS: 1947 TO 1960

[In thousands. As of April except as noted. Beginning 1960, includes Alaska and Hawaii. Percent not shown where base is less than 200,000. Minus sign (-) denotes decrease. For definitions of type of unit, see pp. 2, 3. See also *Historical Statistics, Colonial Times to 1957*, series A 242-247]

No. 33. PROJECTIONS OF HOUSEHOLDS, FAMILIES, AND MARRIED COUPLES: 1959 TO 1980

[In thousands. Excludes Alaska and Hawaii. Based on 1950 Definition of Household; see text, p. 3. Population base from *Current Population Reports*, Series P-25, No. 187. (See also table 3.) Series A and B based on population projection Series II and Series C and D on population projection Series III. Series A, B, and C assume, in varying degree, increases in the proportion married in each age group; Series D assumes no change. The general method of projection in each series, given the initial projection of marital status for that series, was as follows: A—average annual change from 1950 to 1956-58 in the proportion of persons in each age group who were household heads of a given type was assumed to continue to 1965; one-half assumed for 1965 to 1975; one-quarter assumed for 1975 to 1980. B—one-half the average annual change from 1950 to 1956-58 was assumed for the period 1957 to 1965; one-quarter assumed for 1965 to 1975; it was assumed that no change would occur thereafter. C—one-quarter the average annual change from 1950 to 1956-58 was assumed for the period 1957 to 1965; it was assumed that no change would occur thereafter. D—1956-58 proportion of persons in each age group who were heads of households of a given type was assumed to continue to 1980]

NO. 39. RELIGIOUS BODIES—CHURCH MEMBERSHIP, NUMBER OF PASTORS, AND SUNDAY SCHOOL ENROLLMENT

[Beginning 1950, includes Alaska and Hawaii. Represents latest information available from religious bodies; excludes a few groups giving no data, such as Church of Christ, Scientist. Totals include, substantially, those religious bodies reporting to Bureau of Census for Census of Religious Bodies in 1936. Not all groups follow same calendar year nor count membership in same way; some groups give only approximate figures. Roman Catholics count all baptized persons, including infants, Jews regard as members all Jews in communities having congregations; Eastern Orthodox Churches include all persons in their nationality or cultural groups; most Protestant bodies count only persons who have attained full membership, and previous estimates have indicated that all but a small minority of these are over 13 years of age; however, many Lutheran bodies and Protestant Episcopal Church now report all baptized persons, and not only those confirmed]

RELIGIOUS BODY	Year	Number of churches reported	Church membership (1,000)	Number of pastors with charges	Sunday or Sabbath School enrollment ¹ (1,000)

Section 2

Vital Statistics, Health, and Nutrition

This section presents vital statistics—data on births, deaths, fetal deaths (stillbirths), marriages, divorces—and data on communicable diseases, mental health, medical care, hospitals, and nutrition. Vital statistics are compiled and published by the National Office of Vital Statistics, Public Health Service, in its annual report, *Vital Statistics of the United States*, and its *Monthly Vital Statistics Report*. Reports in this field are also issued by the individual State bureaus of vital statistics.

Births and deaths.—The collection of death statistics on an annual basis began in 1900. Then the death-registration States consisted of 10 States and the District of Columbia. In 1915, the collection of birth statistics began with 10 States and the District of Columbia. The changing composition of the two registration areas¹ makes it impossible to obtain geographically comparable birth and death data for the entire United States before 1933. However, the rates for the expanding groups of registration States are approximations of national rates, and general comparisons over a long period of years can be made. Beginning with 1933, the birth and death registration areas have comprised the entire United States, including Alaska beginning 1959 and Hawaii beginning 1960. National statistics on fetal deaths were compiled for 1918 and annually since 1922.

Prior to 1951, and in 1955, birth statistics were based on a complete count of the records received in the National Office of Vital Statistics. From 1951 to 1954, and for 1956 and subsequent years, the figures were based on a 50-percent sample of all registered births. Adjustments shown for underregistration of births are based, for the most part, on the results of nationwide tests of registration completeness in 1940 and 1950.²

Current death statistics are based on a 10-percent sample of death certificates filed in State vital statistics offices; deaths among Armed Forces abroad are excluded. Fetal deaths (stillbirths) are also excluded from death statistics. Fetal death figures represent only fetal deaths for which the period of gestation was 20 weeks or more, or was not stated, since many States do not require the registration of earlier fetal deaths. Neonatal deaths represent deaths of infants under 28 days old, exclusive of fetal deaths.

Since 1900 the causes of death have been classified according to 7 different revisions of the *International Lists of Diseases and Causes of Death*, issued by the Public Health Service. It has been the practice to revise the *International Lists* every 10 years to keep abreast of medical knowledge. Each revision has produced some break in the comparability of cause-of-death statistics. The extent of the changes is discussed in "The Effect of the Sixth Revision of the International Lists of Diseases and Causes of Death Upon Comparability of Mortality Trends," *Vital Statistics—Special Reports*, Vol. 36, No. 10, and *Vital Statistics of the United States, 1958*, Vol. 1. The latest (7th) revision was made in 1958.

Births, deaths, and fetal deaths are classified by place of occurrence and by place of residence³ of the mother or of the decedent.

Marriages and divorces.—National collections of statistics on marriages and divorces in the United States were made for the years 1867 to 1906, 1916, 1922 to 1932, 1937 to 1940, and 1944 to 1960. Estimates have been made for the intervening years as well as for years in which collections were not complete. A marriage-registration area was

¹ For coverage of these areas, see *Historical Statistics of the United States, Colonial Times to 1957*, series B 1-5.

² For a description of these tests and their findings see "Birth Registration Completeness in the United States and Geographic Areas, 1950, Part I, Data for Each State," *Vital Statistics—Special Reports*, Vol. 39, No. 2.

³ For a discussion of methods of residence allocation and of significance of residence figures, see *Vital Statistics of the United States, 1950*.

established by the National Office of Vital Statistics on January 1, 1957; it covers 35 States and 3 independent registration areas. A divorce-registration area was inaugurated on January 1, 1958; it comprises 20 States and 1 independent registration area. These registration areas were established in order to improve national statistics of marriages and divorces. Criteria for the participation of a State in these registration areas are listed in *Vital Statistics of the United States, 1958*, Vol. 1, pp. 1-10.

Vital statistics rates.—Vital statistics rates computed by the National Office of Vital Statistics are based upon the enumerated population figures as of April 1 for 1940, 1950, and 1960 and upon the estimated midyear population figures for other years, provided by the Bureau of the Census unless otherwise noted. The special situation created by the changes in size and disposition of the Armed Forces necessitated the use of different types of population bases during the war and postwar period.⁴ Birth and divorce rates for 1941 to 1946 for the United States are based on the total population including members of the Armed Forces abroad. Birth and divorce rates for 1940 and 1947 to 1960, and death and marriage rates for 1940 to 1960, for the United States and the individual States are based on total population present in the area, excluding Armed Forces abroad.

Morbidity.—Annual data on morbidity are compiled by the Public Health Service and published as a supplement to its *Morbidity and Mortality Weekly Report*. The list of diseases reported by individual States depends upon laws or regulations within the various States. However, most of the common communicable diseases are reportable in all States. Data on morbidity in the general population are also obtained occasionally by special surveys conducted in various communities or States. A clearing-house of such surveys is maintained by the Public Health Service.

Another source of health statistics is the National Health Survey's continuing program which collects statistics on disease, injury, impairment, disability, and related topics on a uniform basis for the nation as a whole. The various reports are published under the general title, *Health Statistics from the U.S. National Health Survey*.

Morbidity statistics for members of the Armed Forces are prepared and published by the Departments of the Army, Navy, and Air Force. The Department of Labor compiles statistics of industrial injuries (see pp. 228 and 229).

Medical care.—Statistics of hospitals are obtained from the annual survey of hospitals conducted by the American Hospital Association. These statistics are published annually by that organization in *Hospitals*, Guide Issue, and include only hospitals that meet American Hospital Association requirements for listing. A relatively large number of institutions that provide health care, such as nursing and convalescent homes, are not included in the survey. Included are nearly all hospitals in the country that meet the following definition: A hospital is any establishment providing medical and registered nurse supervision; and offering services, facilities, and beds for use beyond 24 hours by 6 or more nonrelated individuals requiring diagnosis, treatment or care for illness, injury, deformity, infirmity, abnormality, or pregnancy; and regularly making available at least (1) clinical laboratory services, (2) diagnostic X-ray services, and (3) treatment facilities for (a) surgery, (b) obstetrical care, or (c) other definitive medical treatment of similar extent. Statistics supporting comprehensive, long-range plans for construction of hospital facilities authorized under Title VI of the Public Health Service Act, as amended, are revised annually, and are available from the Public Health Service. Summary data from the same source on existing hospital beds from 1948 to 1959 appear in *Public Health Reports* (December 1959 issue). Detailed data on existing hospital beds as of July 1, 1956, appear in *The Nation's Health Facilities—Ten years of the Hill-Burton Hospital and Medical Facilities Program, 1946-1956*, Public Health Service Publication No. 616.

⁴ For a discussion of the interpretation of crude rates during wartime, see "Summary of Natality and Mortality Statistics, United States, 1943," *Vital Statistics—Special Reports*, Vol. 21, No. 1, and "Marriage and Divorce in the United States, 1937 to 1945," *Vital Statistics—Special Reports*, Vol. 23, No. 9.

Statistics on institutional population based on the 1950 Census of Population include information on number and characteristics of persons in long-term hospitals, in homes and schools for the mentally and physically handicapped, and in homes for the aged and dependent (*U. S. Census of Population, 1950, Vol. IV, Part 2C*).

Sample surveys are conducted occasionally to provide information on the medical care received by the population of various communities or States, and certain insurance organizations publish statistics on the medical care received by their beneficiaries.

Another aspect of medical care is provided by statistics on patients in hospitals for mental disease, and in institutions for mental defectives and epileptics. From 1926 to 1946, such data were collected annually by the Bureau of the Census. Beginning with the 1947 report, the data appear in the annual report, *Patients in Mental Institutions*, issued by the National Institute of Mental Health, Public Health Service.

Nutrition.—Statistics on the apparent per capita consumption of food and its nutrient value are estimated by the Department of Agriculture and published quarterly (nutrient value, annually) in the *National Food Situation*. A discussion of methods used to compute these figures and more detailed information appear in Agriculture Handbook No. 62, *Consumption of Food in the United States, 1909-52*, and the 1956 and later supplements to that publication present revised and current figures.

Statistics on Federal food distribution programs, and data on the quantity and costs of the food commodities distributed and the number of persons participating in the programs are published annually in *Agricultural Statistics*.

Alaska and Hawaii.—For a general statement concerning the treatment of data for Alaska and Hawaii, see preface. "Conterminous area" refers to the United States excluding Alaska, Hawaii, and outlying areas.

Historical statistics.—Tabular headnotes (as "See also *Historical Statistics, Colonial Times to 1957, series B 7-9*") provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

Fig. VI. VITAL STATISTICS RATES: 1915 TO 1960

[See tables 42 and 43]

No. 42. BIRTHS, DEATHS, MARRIAGES, AND DIVORCES, AND RATE PER 1,000 POPULATION: 1910 TO 1960

[In thousands. Beginning 1959, includes Alaska, and 1960, Hawaii. Births and deaths are registered births and deaths only; for years prior to 1933 not all States were represented (see text, p. 45); for births adjusted for under-registration, see table 43. See also *Historical Statistics, Colonial Times to 1957*, series B 7-9, B 129, B 176, and B 178]

Reproduction Rate—Births

49

No. 44. GROSS AND NET REPRODUCTION RATE, BY COLOR: 1905 TO 1959

[Beginning 1959, includes Alaska. Based on births adjusted for underregistration, and on annual life tables and population estimates by age, except as noted. A net reproduction rate of 1,000 means that each generation would just replace itself, if birth and death rates of a specified period were to continue indefinitely, in the absence of net immigration. A rate above 1,000 implies a potentially gaining population, and a rate below 1,000, a potentially declining population. A gross reproduction rate of 1,000 means that if all women born at the beginning of a generation were to live through their reproductive period and continue birth rates existing at the time of their birth, they would barely reproduce themselves, assuming no migration from outside the area. Where gross reproduction rate is less than 1,000, an improvement in mortality alone would not prevent a potential decline in population. See also *Historical Statistics, Colonial Times to 1957*, series B 31-36]

¹ Based on 50-percent sample of live births.

² Provisional and unadjusted, and by place of occurrence.

³ Rate per 1,000 population (excluding Armed Forces abroad) enumerated as of April 1 for 1940 and 1950 and estimated as of July 1 for all other years.

⁴ Beginning 1959, includes Alaska, and 1960, Hawaii.

⁵ Includes estimate for Massachusetts. ⁶ Not available.

Registered Live Births

51

No. 47. REGISTERED LIVE BIRTHS, BY COLOR, FOR URBAN AND RURAL AREAS, BY STATES: 1958 AND 1959

[By place of residence. Based on a 50-percent sample. Definition of urban and rural based on 1940 Census of Population; see p. 2. Tests made in 1950 indicate that for the country as a whole, errors in residence reporting result in a significant overstatement of births to residents of urban places, and a corresponding understatement in the number to residents of areas classified as rural.]

No. 49. LIVE BIRTH RATE ADJUSTED FOR UNDERREGISTRATION, BY ORDER OF BIRTH, FOR NATIVE WHITE WOMEN: 1925 TO 1959

[Beginning 1959, includes Alaska. Births per 1,000 women 15 to 44 years old. Includes adjustments for States not in the birth-registration area prior to 1933. Figures for births of order not stated are distributed. Estimates and population bases for 1925, 1930, and 1935 (as of July 1) prepared by P. K. Whelpton. For 1940 and 1950, based on enumerated population as of April 1; for 1945, estimated as of April 1; and for 1955 to 1959, estimated as of July 1. See also *Historical Statistics, Colonial Times to 1957*, series B 10-18]

¹ Deaths from deliveries and complications of pregnancy, childbirth, and the puerperium. Beginning with 1958, deaths are classified according to seventh revision of *International Lists of Diseases and Causes of Death*; see text, p. 45.

² Includes only fetal deaths (stillbirths) for which period of gestation was 20 weeks (or 5 months) or more, or was not stated.

³ Not available. ⁴ Provisional.

⁵ Represents deaths of infants under 28 days old, exclusive of fetal deaths.

No. 58. DEATH RATE PER 1,000 POPULATION, BY COLOR AND SEX, AND BY AGE: 1900 to 1960

[Beginning 1959, includes Alaska, and 1960, Hawaii. 1940 to 1960 based on population residing in area. Rates for 1940, and 1950, based on population enumerated as of April 1, for all other years estimated as of July 1. Data prior to 1933 for death-registration States only; see text, p. 45. See also *Historical Statistics, Colonial Times to 1957*, series B 129-136]

¹ Based on population enumerated as of April 1 for 1940 and 1950, and estimated as of July 1 for other years. Rates per 100,000 population residing in area.

² Estimated; based on a 10-percent sample of death certificates.

³ Not available.

⁴ Includes neoplasms of lymphatic and hematopoietic tissues.

⁵ Excludes diarrhea of newborn.

No. 68. ESTIMATES OF MARRIAGES FOR THE UNITED STATES AND MARRIAGE LICENSES ISSUED IN MAJOR CITY AREAS, BY MONTH: 1950 TO 1960

[Beginning 1959, includes Alaska, and 1960, Hawaii. Provisional data. Figures for major-city areas represent licenses issued in 35 cities with population of 100,000 or more according to the 1950 Census, and in 69 counties containing the remaining 72 cities in that population-size group. These areas contain nearly two-fifths of the total population of the United States]

Vital Statistics, Health, and Nutrition

No. 94. SPECIFIED REPORTABLE DISEASES—CASES REPORTED, BY MONTH: 1959

[Excludes Hawaii. Figures in this table and table 95 should be interpreted with caution. Reporting of most of these diseases is known to be seriously incomplete. However, these figures have proved valuable to health authorities by indicating significant changes in disease incidence. They should not be interpreted as measures of total amount of illness caused by the diseases concerned.]

No. 98. DAYS OF DISABILITY PER YEAR AND PER 100 PERSONS, BY ACUTE CONDITION GROUP: 1960

[For year ending June 30. Includes Alaska and Hawaii. Data refer to civilian noninstitutional population and contain some duplications, since time lost because of several concurrent conditions is counted under each contributing condition. Based on a sample and subject to sampling variability; see source for detailed explanation. For definitions of types of time lost, see footnotes, table 99]

ITEM	ACUTE CONDITION GROUP					
	Infectious and parasitic	Respiratory	Digestive	Injuries	All other	
Number of cases.....	1,000,000	42.7	207.9	18.6	45.7	40.3
Rate per 100 persons.....		24.5	119.1	10.6	26.2	23.1
TOTAL DISABILITY DAYS (1,000,000)						
Restricted activity.....		209.4	755.3	77.7	264.5	238.6
Bed disability.....		98.1	344.7	35.1	70.9	96.4
Work loss ¹		17.2	117.9	17.5	59.5	29.3
School loss ²		41.9	101.7	6.5	14.0	13.0
DAYS PER 100 PERSONS						
Restricted activity.....		119.9	432.6	44.5	151.5	136.6
Bed disability.....		56.2	197.4	20.1	40.6	55.2
Work loss ³		28.1	192.4	28.5	97.0	47.8
School loss ²		112.5	273.2	17.5	37.6	35.0

¹ Computed for persons 17 years old and over.

² Computed for children 6 to 16 years old.

³ Population upon which rate is computed is only persons 17 years old and over who reported "working" as their major activity during the 12-month period preceding the week of interview.

Source: Department of Health, Education, and Welfare, Public Health Service, *Health Statistics From the U.S. National Health Survey*.

No. 99. DAYS OF DISABILITY PER YEAR AND PER PERSON, BY TYPE OF TIME LOST AND SEX: 1960

For year ending June 30. Includes Alaska and Hawaii. Data refer to civilian noninstitutional population. Based on a sample and subject to sampling variability; see source for detailed explanation]

TYPE OF TIME LOST	TOTAL DISABILITY DAYS (1,000,000)			DAYS PER PERSON					
	Both sexes	Male	Female	Total	Sex		Residence		
					Male	Female	Urban	Rural nonfarm	Rural farm
Restricted-activity days ¹	2,830.1	1,214.8	1,615.3	16.2	14.3	18.0	15.5	16.5	18.7
Bed-disability days ²	1,054.8	454.3	600.5	6.0	5.3	6.7	6.0	6.0	6.1
Work-loss days ³	369.9	244.4	125.5	5.6	5.5	5.6	5.5	5.2	6.0
School-loss days ⁴	195.5	93.3	102.2	5.3	4.9	5.6	5.4	4.9	5.4

¹ A day when a person cuts down on his usual activities for the whole of the day because of an illness or an injury. Includes bed-disability, work-loss, and school-loss days.
² A day on which a person was kept in bed either all or most of the day because of an illness or injury. Includes those work-loss and school-loss days actually spent in bed.
³ A day is counted as a work-loss day if a person loses the entire work day because of illness or injury. Computed for persons 17 years of age and over. Population upon which rate is computed includes only persons who were "currently employed," defined as those who were working or had a job or business during the 2-week period preceding the week of interview.
⁴ A day is counted as lost from school if the child lost the entire school day because of illness or injury. Computed for children 6 to 16 years of age.

					Median ⁴	\$195	\$700	\$95	\$600

¹ A couple consists of a beneficiary drawing a retired worker's benefit and a spouse, whether or not entitled to benefits. Included are 47 couples that had a member hospitalized the entire survey year or that were broken by death, divorce, or legal separation during the survey year.
² In a general hospital or in an institution for long-term care such as a nursing home or mental or tuberculosis hospital; in case of beneficiary couples, one or both members were hospitalized.
³ Includes beneficiaries never married, widowed, divorced, or separated during the entire survey year.
⁴ Medians are interpolated from intervals, excluding beneficiary groups with cost not reported.

No. 102. PERCENT DISTRIBUTION OF AGED COUPLES AND NONMARRIED BENEFICIARIES, BY MEANS OF MEETING MEDICAL COST: 1957

[Based on survey of Old-Age and Survivors Insurance Beneficiaries. For coverage under Social Security, see text, p. 261]

MEANS OF MEETING COST	BENEFICIARY COUPLES ¹			NONMARRIED BENEFICIARIES ³		
	All couples	Not hospitalized	Hospitalized ²	All beneficiaries	Not hospitalized	Hospitalized ²
Total.....	100.0	100.0	100.0	100.0	100.0	100.0
No cost incurred.....	2.8	3.5	56.9	8.3	9.8	-----
All costs met out of beneficiary's resources ⁴	78.4	84.5	56.9	70.3	75.3	42.2
Some costs met out of beneficiary's resources; beneficiary incurred debts for balance.....	5.5	2.6	15.8	2.2	1.6	6.0
Some or all costs met by others, total ⁵	13.2	9.3	27.0	19.0	13.3	51.8
By relatives ⁶	6.5	4.4	14.1	10.4	7.3	28.1
By public assistance agency.....	2.2	1.6	4.1	5.6	3.9	15.3
By other public or private welfare agency, including hospital ⁷	5.6	3.4	13.2	4.7	2.6	16.5
Percent with costs met by health insurance.....	15.2	4.4	52.9	7.7	1.4	43.4
Percent incurring medical debts.....	6.8	3.0	20.3	3.1	2.0	9.6

¹ See footnote 1, table 101. ² See footnote 2, table 101. ³ See footnote 3, table 101.

⁴ Beneficiary resources include income, assets, and health insurance.

⁵ Total is smaller than sum of sub-items because sub-items are not mutually exclusive.

⁶ Includes only beneficiaries who had medical bills paid directly by relatives or who received money from relatives to pay their medical bills. Excludes beneficiaries whose housing and food costs were paid wholly or in part by relatives, thereby enabling beneficiaries to use their own resources to pay medical bills.

⁷ Includes a few cases where a private physician made no charge.

No. 104. NUTRITION—NUTRIENTS AVAILABLE FOR CIVILIAN CONSUMPTION PER CAPITA PER DAY: 1910 TO 1960

[Excludes Alaska and Hawaii. Computed on basis of estimates of apparent civilian consumption (retail basis) including consumption from rural and urban home gardens. Based on Bureau of the Census estimated population as of July 1. No deductions have been made in nutrient estimates for loss or waste in home or for destruction or loss of nutrients during preparation of food. Deductions have been made for inedible refuse. Data for iron, thiamine, riboflavin, and niacin include amounts of these nutrients added to prepared cereals, bread, and white flour under enrichment program. See also *Historical Statistics, Colonial Times to 1957*, series G 546-551]

¹ Represents cost to the Federal Government of the commodity as delivered to the State distributing agency and includes cost of purchase, handling, warehousing, and transportation, but excludes administrative costs.

² For 1940, represents School Milk Program, which was merged with indemnity plan in July 1943. See also headnote, table 109.

³ Initiated in September 1954 to increase the consumption of fluid milk in schools and child-care institutions authorized under the Agricultural Act of 1954, as amended.

¹ Data are for November 1959 and represent average number of children participating in program for that month. The number of schools and children may have been higher in some States during other months but November was the peak month in terms of children participating nationally.

² Source: Latest data available from the Office of Education. Enrollment data for public schools are for fall 1969. Private school enrollment is for 1957-58.

³ Excludes participation of the Type C, or milk only, lunch authorized under National School Lunch Program. Reimbursement for this type has been discontinued in other States.
