New York, New York 10166

Re: *ICAN v. CDC*, 20 Civ. 6177 (JGK)

Dear Ms. Brehm:

I am writing on behalf of defendant Centers for Disease Control and Prevention (“CDC”) to respond in part to plaintiff Informed Consent Action Network’s (“ICAN”) letter dated October 12, 2021 (the “Oct. 2021 Letter”).

Attached please find a draft *Vaughn* index justifying CDC’s withholdings under FOIA Exemption 5 for 63 of the 73 records identified in ICAN’s October 2021 Letter. Upon further re-review of 10 of the 73 records, CDC has decided to release portions of records previously withheld under Exemption 5. Those records are:

CDC002215
CDC-002820-002824
CDC-002865-002866
CDC-002946-002951
CDC-003023-003025
CDC-003104-003106
CDC-003220-003223
CDC-003242
CDC-003251-003257
CDC-003259

I will be uploading to the USAfx dropbox a re-released set of the 73 records, which includes updated releases for the 10 records identified above.

Please let me know if you have any questions regarding this letter.

Sincerely,

DAMIAN WILLIAMS
United States Attorney

Subject: Seasonal flu vaccine manufacture: Getting ready for a fall wave.

Hi Jay and Nancy,

BLUF: Is now the time to push for manufacture of enough flu vaccination to cover the entire recommended US population?

- Is now the time to press for the manufacture of enough seasonal influenza vaccine to cover all persons in the U.S. recommended to receive it and to begin messaging to a public more ready than ever to act to protect others that this can reduce deaths and hospitalizations from flu directly and deaths from potential later waves of COVID-19?
- Can a flu vaccine, including one that is incompletely effective when administered to ~49% of the recommended population further help unburden the healthcare system, and save lives if it can be administered to 75-85% or more of the recommended population?
- Can a late summer early fall push serve as way to practice, test and prove our public-private ability to rapidly vaccinate all who can and wish to receive it when a COVID-19 vaccine becomes available?
- Is the public more willing now than ever to do their part to protect others as well as themselves?

My guess is you are already thinking about this. Though obviously we will see many more, it hit me hard when I realized the global burden of COVID-19 deaths had just surpassed our low end estimates for [flu](#) deaths this particularly bad flu year a few days ago. I also heard a tangential reference from POTUS in the WHTF presser yesterday.

Hope we can consider and let me know how I can help.

Dr. Wharton,

I am a health communications specialist with the Influenza Division, and I am trying to respond to a media inquiry about vaccine manufacturing.

I ran the questions by Dave Wentworth and he said you may be better suited to help.

I've pasted the inquiry below, along with Dr. Wentworth's responses.

Please let me know if this is something you can help with.

Thanks in advance for your help.

-RED Denty

"I'm a writer for AccuWeather.com and have been covering the flu in the U.S. all season. I have some questions I'm hoping someone at the CDC can help me with.

Do you know the status of the process for creating the flu vaccine for the fall? As I understand the regular steps, WHO and the CDC in the U.S. should have begun the process in February and manufacturers could already be making it.

However, did the COVID-19 pandemic affect those plans? If there was a delay to starting the process, what will that mean for production of the flu vaccine? Will it be delayed – and if so, by how long?

The selection of vaccine components went on track and most reagents available for manufactures. However, much of the downstream processes are out of my knowledge. There may have been challenges with manufacturing associated with response to covid19 such as social distancing etc. Would need to hear directly from manufacturers. M Wharton knows more about distribution.

And will more than normal need to be made because it's likely flu vaccine demand will be much greater than normal?

Again I don't know directly. Typically more is made than is used

(b)(5)

Questions for CDC:

Hi,

I'm a writer for AccuWeather.com and have been covering the flu in the U.S. all season. I have some questions I'm hoping someone at the CDC can help me with.

Do you know the status of the process for creating the flu vaccine for the fall? As I understand the regular steps, WHO and the CDC in the U.S. should have begun the process in February and manufacturers could already be making it.

However, did the COVID-19 pandemic affect those plans? If there was a delay to starting the process, what will that mean for production of the flu vaccine? Will it be delayed – and if so, by how long?

The selection of vaccine components went on track and most reagents available for manufactures. However, much of the downstream processes are out of my knowledge. There may have been challenges with manufacturing associated with response to covid19 such as

social distancing etc. Would need to hear directly from manufacturers. M Wharton knows more about distribution.

And will more than normal need to be made because it's likely flu vaccine demand will be much greater than normal?

Again I don't know directly. Typically more is made than is used

(b)(5)

(b)(5) M. Wharton is better than me to answer.

Thanks for whatever help you can provide!

John

Subject: RE: Connecting you with the director, re: Chloroquine &Hydroxychloroquine

Dear Dr. Redfield and all,

Tim's email reminds me of two points I should add. There is an association of chloroquine and hydroxychloroquine with prolonged QT interval, but this is a rare event. The case studies reporting these events are primarily in those receiving daily, prolonged (years) doses of chloroquine or hydroxychloroquine in combination with liver or renal dysfunction. Its cardiotoxic effects may be concerning when used in combination with other drugs that may have cardiotoxic effects, and when used in severely ill patients.

Chloroquine and hydroxychloroquine have long half-lives (1-2 months) and is dosed weekly for malaria prophylaxis. This long half-life and the evidence from the in vitro studies provide an interesting suggestion (b)(5) Great to see studies planned.

Thanks,
Kathrine

Subject: RE: Connecting you with the director, re: Chloroquine & Hydroxychloroquine

Dear Dr. Redfield et al,

To add to Katherine's nice summary, I included information on hydroxychloroquine as well as use of chloroquine or hydroxychloroquine for SARS-CoV-2 infection.

*There are no available data from any RCTs to inform clinical guidance on the use of chloroquine or hydroxychloroquine for prophylaxis or treatment of SARS-CoV-2 infection.

*Chloroquine or hydroxychloroquine have been administered on an uncontrolled basis to hospitalized COVID-19 patients in several countries (including the U.S.) based upon *in-vitro* data for SARS-CoV, and two *in-vitro* studies of SARS-CoV-2 from China (Wang Cell Research 2020; Yao CID 2020). One *in-vitro* study showed that hydroxychloroquine had greater activity against SARS-CoV-2 than chloroquine. Despite lack of data from RCTs, clinical guidance in China, South Korea, Belgium, and other countries recommend chloroquine or hydroxychloroquine for treatment of hospitalized COVID-19 patients in addition to other investigational therapeutics. While chloroquine and hydroxychloroquine might potentially have antiviral and immunodulatory effects on SARS-CoV-2 infection, there are some potential safety issues (e.g. just a few are prolonged QT syndrome, immunosuppression), especially when combined with some other drugs that have been used for uncontrolled treatment of COVID-19 patients. (b)(5) the CDC Clinical Team cannot make any recommendations (b)(5)

(b)(5)

*Multiple clinical trials of chloroquine or hydroxychloroquine are planned for pre-exposure prophylaxis, post-exposure prophylaxis, or treatment of SARS-CoV-2 infection in several countries.

*A randomized 3-month prophylaxis study of chloroquine versus placebo for COVID-19 in persons 16 years and older is planned in the U.K.

<https://clinicaltrials.gov/ct2/show/NCT04303507?term=chloroquine&cond=COVID-19&draw=2&rank=1>

*Multiple clinical trials of investigational therapeutics that include chloroquine, including in combination with other drugs for COVID-19 are planned in China and Thailand.

<https://clinicaltrials.gov/ct2/show/NCT04286503?term=chloroquine&cond=COVID-19&draw=2&rank=3>

<https://clinicaltrials.gov/ct2/show/NCT04303299?term=chloroquine&cond=COVID-19&draw=2&rank=4>

*One study of lopinavir/ritonavir versus hydroxychloroquine for treatment of mild COVID-19 is enrolling in South Korea.

<https://clinicaltrials.gov/ct2/show/NCT04307693?term=hydroxychloroquine&cond=COVID-19&draw=2&rank=1>

*One study of hydroxychloroquine versus standard of care for treatment of COVID-19 pneumonia is enrolling in China.

<https://clinicaltrials.gov/ct2/show/NCT04261517?term=Hydroxychloroquine&cond=COVID-19&draw=2&rank=2>

*A cluster randomized "ring treatment and post-exposure prophylaxis trial" is planned among persons 18 years and older in Italy. This study will assess hydroxychloroquine plus darunavir/cobicistat treatment of COVID-19 cases and hydroxychloroquine post-exposure prophylaxis of contacts of COVID-19 cases versus standard isolation and contact tracing.

<https://clinicaltrials.gov/ct2/show/NCT04304053?term=chloroquine&cond=COVID-19&draw=2&rank=2>

*At least 2 randomized studies of hydroxychloroquine versus placebo for post-exposure prophylaxis of SARS-CoV-2 are being planned in the U.S. (Seattle, Minnesota)

<https://clinicaltrials.gov/ct2/show/NCT04308668?term=hydroxychloroquine&cond=COVID-19&draw=2&rank=4>

*DoD is considering studies of hydroxychloroquine pre-exposure prophylaxis as well as hydroxychloroquine treatment of COVID-19 patients in the U.S. The Australian military may also be considering a study of pre-exposure prophylaxis with hydroxychloroquine.

Hydroxychloroquine (Plaquenil) package insert and one in-vitro study of hydroxychloroquine activity against SARS-CoV-2 are attached.

Thanks,

Tim

Subject: RE: Connecting you with the director, re: Chloroquine & Hydroxychloroquine

Dear Dr. Redfield and all,

Chloroquine has been observed to be effective in limiting SARS-COV2 in vitro. Published clinical trial data on its efficacy for treatment of COVID-19 are lacking.

Chloroquine is known to have anti-inflammatory effects and *in vitro* evidence that it inhibits cell entry of the virus in primate cells in culture.

Information attached:

1. • Systematic review on efficacy and safety of chloroquine for treatment of COVID-19 (Cortegiana et al) – only abstract is available. Waiting on article from library.
2. • Short communication about in vitro data (Wang_InVitro_CellResearch_2020.pdf)
3. • Letter to the editor from Chinese scientists on clinical trials (Gao_et al_Chloroquine-COVID-19.pdf)
4. • Chloroquine FDA label with general information about the drug (CQ_Westward_FDA_label.pdf)

Please feel free to call me if you have questions: (b)(6)

Kind Regards,
Kathrine

(b)(5)

Good morning,

Late yesterday we received a request for a review and comment (b)(5)

(b)(5)

The White House/NSC has sent a suspense to have the document reviewed and comments submitted to them by 5 PM this Friday, 6 March.

Request your input by 2pm on Friday, March 6. Submit it to the Plans Section Chief, at eocplans@cdc.gov

The key areas for CDC to review are (b)(5)

(b)(5)

Please review the appendices applicable to your task force or team. You are also welcome to review and comment on other sections of the document as time permits.

These appendices cover:

(b)(5)

Please use the attached excel spread sheet to annotate your comments. Do not use track changes. The NSC will only accept the excel spreadsheet.

The Plans Team will consolidate the comments and submit them back to HHS for consolidation into the final plan for White House approval.

We realize this is a very short suspense with all that is going on the next 36 hours.

We greatly appreciate your help and support.

If you have questions please contact the Plans Section Chief.

John Bermingham

Adding a LOT of thanks to everyone for the teamwork and rapid turn-around to meet the noon deadline for the ASPR today.

The ASPR did brief the Secretary this morning at 9 am. We will look forward to any information from the meeting and this document soon to guide the next step.

Chris Hassell, can you please confirm when this is finalized and circulate the final version so all have record of what was submitted to the Secretary to prepare for any follow on questions?

Thanks everyone, Rick

Chris,

Hi. please see attached document as requested. Greatly appreciate the quick turn-around from everyone that contributed. Since we have already briefed the vaccine candidates, I moved that to an appendix.

Thanks.

Robert

Just so you guys know, we have been sending lots of items to OVP for clearance for web posting and have gotten a lot of it back already. I have a FEMA comms call in a bit, but the guidance thus far is clearance via OVP comms not within the FEMA comms structure itself.

More to come,
Kate

Subject: Novel Coronavirus PCC

When: Wednesday, February 5, 2020 1:00 PM-2:30 PM (UTC-05:00) Eastern Time (US & Canada).

Where: WHSR JFK

Dear Colleagues,

SAP Ruggiero will convene a nCoV PCC on **February 5, 2020, from 1:00-2:30 PM**. With exception of CDC Atlanta, NIAD, and FDA there will be no SVTC. Due to space constraints we ask that departments and agencies, as well as EOP components, send the minimum number of participants. Accordingly, individuals attending this meeting must have the authority to speak on the behalf of their organization.

Please use the WAVES link to register for attendance.

(b)(6)

Lauren

Subject: H1n1 background question related to coronavirus supplemental

Sherri, Christa - Senate staff are asking whether

- vaccines were purchased during H1N1,
- were distributed through VFC and 317,
- were available for free/had the administrative costs waived by HHS, and
- HHS encouraged waiving of admin costs by private payers as well.

Do you have any memory or information on this history?

Norris

We have received a request for estimates of the cost of the attached provisions. We would appreciate your working with Norris/DDP as quickly as possible to develop estimates. I have included both CDC and ASPR since this may cross over both organizations. I realize this may have a wide confidence interval.

Subject: Industry Questions

Good evening and thanks again for being on the 3pm call. Please see the attached document which contains relevant questions we have received from industry for your review.

While for some questions we may not have sufficient guidance yet, the more we are able to address each question in some capacity, then the greater collaboration and certainty we can have from the business community. The goal here is to have each agency designate which question(s) they are prepared to answer in their remarks tomorrow.

Please **highlight** which questions your agency will be covering and send them back to Jim or Joe (both cc'd) by 10:00 AM tomorrow. We will de-conflict and help ensure answers are coordinated between interagency for questions where we have crossover.

Thank you,
 Tim

Tim Pataki
 Deputy Assistant to the President
 Director, Office of Public Liaison

Subject: Which Questions for You on Business Call

Bob and Anne

These are questions that business groups submitted in advance.

WH has asked us to identify which ones our principals will answer.

I took a first crack at that.

Could you confirm you are comfortable with the ones I indicated for you and advise on my uncertain ones?

Laura

Business / Industry Questions Regarding Coronavirus Disease 2019 (COVID-19)

U.S. Domestic Response

1. • What can companies do to be most helpful to the domestic response and the Administration's efforts?
2. • Companies are concerned about their employees/families and about what they should be communicating to their workforce. Companies are closely monitoring the CDC website, as well as others' (e.g., State Department, DOL/OSHA), for updates and guidance. We encourage the Administration to continue to provide timely and consistent communications, in particular on travel restrictions and recommendations.

(b)(5)

3. • Is the Administration using or contemplating avenues other than the CDC, etc., to share new information?

(b)(5)

(b)(5)

Travel/Transportation Issues

4. • Spring months are traditionally high season for business meetings, trade shows, exhibitions, conferences and conventions at a variety of locations across America.
 - a. • With proper precautions in place, are there any public health-related reasons why these events should not continue as planned? (b)(5)
 - b. • Should show organizers “rethink” holding these events in the coming weeks and months? (b)(5)
 - c. • Should attendees to such events reconsider participating? (b)(5)
5. • The Administration expanded travel restrictions over the weekend. What would trigger additional quarantine requirements or other restrictions around travel/transportation?
6. • Should the virus begin to spread at an accelerated rate domestically, what impacts would you anticipate on travel/transportation?
7. • Spring break travel is upon us. Over the next six to eight weeks, millions of American families with school-age children and older students will plan to hit the road.
 - d. • With U.S. public health authorities advising that the risk of coronavirus to the American public remains low, should families feel confident in scheduling and taking those trips? (b)(5)
 - e. • Beyond adhering to best practices to guard against the typical American flu season, do any public health-related reasons exist for U.S. residents to avoid hitting the road, going to the beach, visiting an amusement park or attraction, staying in a hotel here in the United States? (b)(5)
8. • Is it the opinion of American public health experts that it remains safe to travel by air (and train) when traveling between two points **within the United States**? (b)(5)
9. • What is your counsel as the intelligence on COVID-19 evolves and as more becomes known about this disease? Messages that are true today will likely shift as a potential outbreak spreads in the United States, correct? Should travelers today be concerned for what’s “unknown” about COVID-19? (b)(5)

Medical Issues & Countermeasures

10. • The CDC guidance indicates that symptoms may appear in as few as two days or as long as 14 days after exposure. Some reporting has suggested that the incubation period could be as long as 27 days. Does the Administration have an update on incubation? Does the 2-14 days still stand? (b)(5)

11. • What is the status on testing for the virus and test kits? When will hospitals have the ability to do their own testing? (b)(5)

12. • What is the latest timeline on development and distribution of a vaccine?

Domestically? Globally? (b)(5)

(b)(5)

Federal-State-Local Coordination

13. • How is the Administration tracking developments and coordinating response efforts at the state/local level? Companies have extensive relationships with state/local governments and other networks and organizations in communities throughout the country. How could companies help with coordination efforts?

Industry-Specific Efforts

14. • What can companies in the transportation sector do to help the domestic response? What can companies in the medical supply chain do? (b)(5)

15. • What other industry-specific efforts are the Administration thinking about? For example, Chinese officials announced that banks could only release bills that had been sterilized. Are there any steps banks should be taking to help stop (b)(5)

(b)(5)

Global Response (b)(5)

16. • Are we past the point of containment of a global outbreak? What government resources and mitigation strategies are being deployed to help contain further outbreak in other countries?

17. • What containment/mitigation strategies have other countries taken that have proven effective – and that could be adopted in the U.S.?

Economic Outlook & Impact

18. • Companies are closely monitoring the developing economic impact of the spread of the virus. What is the Administration's thinking on the risk and cost to the U.S. economy? Globally? What steps is the Administration taking to mitigate economic costs?

19. • Specifically, companies are closely monitoring potential disruptions to trade and supply chains. What steps can companies be taking to help facilitate the movement of goods and supplies? (b)(5)

20. • Is the Administration anticipating restrictions on the movement of cargo into the U.S. or onto ships bound to foreign ports? Should the virus begin to spread in the U.S., what impacts would you anticipate on shipping and related activities?

Global Health Security

21. • The immediate focus is, of course, appropriately focused on response to this outbreak. But, what can you share about the Administration's approach to strengthening global health security in the long term? (b)(5)

Employee Health and Safety in Industrial Setting

22. • How far apart should people remain to help eliminate transmission (might allow for specific spacing along a production line)? (b)(5)
23. • If an employee tests positive (see question above about how and when) then should all other staff get tested immediately or is it better to wait and only test if a fever appears etc? Not sure how soon after exposure testing might be effective or if testing will be a highly limited resource? How should any person with possible symptoms be tested? (b)(5)
24. • Are there any environmental factors that can be controlled to help protect employees? Hotter or colder conditions? Use of UV light? Air circulation or filtration guidelines? (b)(5)
25. • Should Industry be self-quarantining employees returning from areas with known cases? (b)(5)

Safety/Protective Gear for Future Response or In Support of Current Response

26. • What is needed and how can our members help? (b)(5)

Subject: In person for Govs call.

Heard back and they would like you to be there in person.

Regarding Liz Hoo, if you would like her with you, then she should do waves and accompany you.

Laura

On: 01 March 2020 19:00, "Trueman, Laura (HHS/IEA)" <Laura.Trueman@hhs.gov>wrote:

I have asked our government relations folks at the WH - right now if it is more convenient, let's plan for it to be by phone.

If I hear differently, I will let you know.

Thanks so much!

Laura

"Schuchat, Anne MD (CDC/OD)" <acs1@cdc.gov>wrote:

Thanks Laura. I sent my waves in. Can you confirm if it's desired for me to be on the governors call in person rather than joining by phone.

There are other Wh events I will be doing later that afternoon but don't need to be back there till I think 3 for the pharmaceutical companies session.

I will be traveling with my special assistant Liz Hoo and wasn't sure if she should expect to join me for one or more of these events and would also need to submit waves.

Thanks for your advice.

Second travel-related case of 2019 Novel Coronavirus detected in United States

The Centers for Disease Control and Prevention (CDC) today confirmed the second infection with 2019 Novel Coronavirus (2019-nCoV) in the United States has been detected in Illinois. The patient recently returned from Wuhan, China, where an outbreak of respiratory illness caused by this novel coronavirus has been ongoing since December 2019.

The patient returned to the U.S. from Wuhan on January 13, 2020, and called a health care provider after experiencing symptoms a few days later. The patient was admitted to a hospital, where infection control measures were taken to reduce the risk of transmission to other individuals. The patient remains hospitalized in an isolation room in stable condition and is doing well.

Based on the patient's travel history and symptoms, health care professionals suspected 2019-nCoV. A clinical specimen was collected and sent to CDC, where laboratory testing confirmed the infection. The Illinois Department of Public Health (IDPH) and the Chicago Department of Public Health (CDPH) are investigating locations where this patient went after returning to Illinois and are identifying any close contacts who were possibly exposed. The patient has limited close contacts, all of whom are currently well and who will be monitored for symptoms. Since returning from China, the patient has had very limited movement outside the home.

CDC is taking aggressive public health measures to help protect the health of Americans. While CDC considers this a serious public health threat, based on current information, the immediate health risk from 2019-nCoV to the general American public is considered low at this time. CDC is working closely with the Illinois Department of Public Health, the Chicago Department of Public Health, and other local partners. A CDC team has been deployed to support the ongoing investigation.

However, CDC has been proactively preparing for the introduction of 2019-nCoV in the U.S. for weeks, including:

- First alerting clinicians on January 8 to be on the look-out for patients with respiratory symptoms and a history of travel to Wuhan, China.
- Developing guidance for clinicians for testing and management of 2019-nCoV, as well as guidance for home care of patients with 2019-nCoV.
- Has developed a diagnostic test to detect this virus in clinical specimens. Currently, testing must take place at CDC, but CDC is preparing to share these test kits with domestic and international partners.
- Implementing public health entry screening at Atlanta (ATL), Chicago (ORD), Los Angeles (LAX), New York (JFK), and San Francisco (SFO) airports. CDC is currently evaluating the extent and duration of this enhanced screening.
- CDC has activated its Emergency Operations Center to better provide ongoing support.

Coronaviruses are a large family of viruses, some causing respiratory illness in people and others circulating among animals including camels, cats and bats. Rarely, animal coronaviruses can evolve and infect people and then spread between people, such as has been seen with Severe Acute Respiratory Syndrome (SARS) and Middle East Respiratory Syndrome (MERS). Investigations are ongoing to learn more, but person-to-person spread of 2019-nCoV is occurring.

It is likely there will be more cases reported in the U.S. in the coming days and weeks. CDC will continue to update the public as circumstances warrant. While the immediate risk of this new virus to the American public is believed to be low at this time, there are simple daily precautions that everyone should always take. It is currently flu and respiratory disease season, and CDC recommends getting vaccinated, taking everyday preventive actions to stop the spread of germs, and taking flu antivirals if prescribed. Right now, CDC recommends travelers avoid all nonessential travel to Wuhan, China. In addition, CDC recommends people traveling to China practice certain health precautions like avoiding contact with people who are sick and practicing good hand hygiene.

For more information about the current outbreak in China, visit <https://www.cdc.gov/coronavirus/2019-ncov/index.html>. For travel health information, visit <https://wwwnc.cdc.gov/travel/notices/watch/pneumonia-china>.

(404) 639-3286

Second travel-related case of 2019 Novel Coronavirus detected in United States

The Centers for Disease Control and Prevention (CDC) today confirmed the second infection with 2019 Novel Coronavirus (2019-nCoV) in the United States has been detected in Illinois. The patient recently returned from Wuhan, China, where an outbreak of respiratory illness caused by this novel coronavirus has been ongoing since December 2019.

The patient returned to the U.S. from Wuhan on January 13, 2020, and called a health care provider after experiencing symptoms a few days later. The patient was admitted to a hospital, where infection control measures were taken to reduce the risk of transmission to other individuals. The patient remains hospitalized in an isolation room in stable condition and is doing well.

Based on the patient's travel history and symptoms, health care professionals suspected 2019-nCoV. A clinical specimen was collected and sent to CDC, where laboratory testing confirmed the infection. The Illinois Department of Public Health (IDPH) and the Chicago Department of Public Health (CDPH) are investigating locations where this patient went after returning to Illinois and are identifying any close contacts who were possibly exposed. The patient has limited close contacts, all of whom are currently well and who will be monitored for symptoms. Since returning from China, the patient has had very limited movement outside the home.

CDC is taking aggressive public health measures to help protect the health of Americans. While CDC considers this a serious public health threat, based on current information, the immediate health risk from 2019-nCoV to the general American public is considered low at this time. CDC is working closely with the Illinois Department of Public Health, the Chicago Department of Public Health, and other local partners. A CDC team has been deployed to support the ongoing investigation.

However, CDC has been proactively preparing for the introduction of 2019-nCoV in the U.S. for weeks, including:

- First alerting clinicians on January 8 to be on the look-out for patients with respiratory symptoms and a history of travel to Wuhan, China.
- Developing guidance for clinicians for testing and management of 2019-nCoV, as well as guidance for home care of patients with 2019-nCoV.
- Has developed a diagnostic test to detect this virus in clinical specimens. Currently, testing must take place at CDC, but CDC is preparing to share these test kits with domestic and international partners.
- Implementing public health entry screening at Atlanta (ATL), Chicago (ORD), Los Angeles (LAX), New York (JFK), and San Francisco (SFO) airports. CDC is currently evaluating the extent and duration of this enhanced screening.
- CDC has activated its Emergency Operations Center to better provide ongoing support.

Coronaviruses are a large family of viruses, some causing respiratory illness in people and others circulating among animals including camels, cats and bats. Rarely, animal coronaviruses can evolve and infect people and then spread between people, such as has been seen with Severe Acute Respiratory Syndrome (SARS) and Middle East Respiratory Syndrome (MERS). Investigations are ongoing to learn more, but person-to-person spread of 2019-nCoV is occurring.

It is likely there will be more cases reported in the U.S. in the coming days and weeks. CDC will continue to update the public as circumstances warrant. While the immediate risk of this new virus to the American public is believed to be low at this time, there are simple daily precautions that everyone should always take. It is currently flu and respiratory disease season, and CDC recommends getting vaccinated, taking everyday preventive actions to stop the spread of germs, and taking flu antivirals if prescribed. Right now, CDC recommends travelers avoid all nonessential travel to Wuhan, China. In addition, CDC recommends people traveling to China practice certain health precautions like avoiding contact with people who are sick and practicing good hand hygiene.

For more information about the current outbreak in China, visit <https://www.cdc.gov/coronavirus/2019-ncov/index.html>. For travel health information, visit <https://wwwnc.cdc.gov/travel/notices/watch/pneumonia-china>.

####

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES

CDC works 24/7 protecting America's health, safety, and security. Whether diseases start at home or abroad, are curable or preventable, chronic or acute, or from human activity or deliberate attack, CDC responds to America's most pressing health threats. CDC is headquartered in Atlanta and has experts located throughout the United States and the world.

Dr. Schuchat/Sherri/Kyle

CDC received a request for a quick NCOV Fact Sheet by the NSC that summarizes key actions that the USG has taken to date as part of the coronavirus response. It was due at 12:30 today.

Erin pulled information directly from our web site – but we would like for you to take a look at the additions from the Policy Unit – Highlighted in yellow. Currently we are debating the following bullet in particular:

Subject: Response Needed - Please send me Indicator Working Group SMEs for 2020 NVP by COB 2/28;
Next IVWG meeting 2/28

Dear IVWG Colleagues,

Attached you will find materials for our next IVWG meeting this **Friday February 28th 12:30-1:30 PM**
ET. (b)(5)

(b)(5) These materials are also attached to the
calendar appointment for easy reference.

Need your response: During our last meeting Tammy requested each agency to submit names of individuals/SMEs for the Indicator Working Group for our National Vaccine Plan work. Please submit these names to me by COB Friday February 28th. We really need to start on the work the indicator working group will be doing.

Looking forward to meeting with everyone on Friday.

Respectfully,
On behalf of Dr. Tammy Beckham

Subject: RE: Request for coronavirus hotline numbers

As of this morning, we are still looking for a few more hotlines to share with the Hill. Below is what Nate and I have collected so far.

Please continue to send any additions.

Thanks,
Jamie

USDA:

Commerce:

DOD:

Education:

FEMA:

FDA: FDA's hotline (1-888-INFO-FDA) is available 24 hours a day for labs to call regarding difficulties obtaining supplies for collecting patient samples for COVID-19 testing, including swabs, media needed for transport, and conservation of the samples. We also encourage labs to reach out at CDRH-EUA-Templates@fda.hhs.gov with any questions related to diagnostic development. You may also be interested in our COVID-19 Frequently Asked Questions page, which contains information on vaccines, diagnostic tests, drugs, medical devices, food and other products FDA regulates.

HHS:

DHS:

Labor:

SBA:

State: The Department of State's phone (1-888407-4747) is available from 8 AM to 8 PM Eastern Standard and is toll-free in the United States and Canada. From other countries, citizens may call 1-202-501-4444. Citizens may also reach out directly to U.S. Embassies and consulates overseas. Links to Embassy links with country specific COVID-19 information is available here and health alerts can be found by searching specific countries here. Travelers who register through the Smart Traveler Enrollment Program at Step.State.gov will receive urgent country-specific updates via e-mail.

Subject: Request for coronavirus hotline numbers

Hello,

White House OLA requests that you share any agency coronavirus hotline contact information with Nate Parker and Jamie Gillespie, cc'd here, by COB today.

Please provide the information in this example – FDA's hotline (1-888-INFO-FDA) is available 24 hours a day for labs to call regarding difficulties obtaining supplies for collecting patient samples for COVID-19 testing, including swabs, media needed for transport, and conservation of the samples. We also encourage labs to reach out at CDRH-EUA-Templates@fda.hhs.gov with any questions related to diagnostic development.

We are all receiving one off requests on who states, providers, constituents, etc. should contact to get in touch with various agencies during this outbreak. To alleviate and streamline these requests, we'd like to compile this information in one centralized place to distribute to the hill.

Thank you,
White House Office of Legislative Affairs

Virginia Heppner McMillin
Special Assistant to the President
Office of Legislative Affairs

Dear ADM Giroir,

Attached are the two community mitigation plans for Florida and Massachusetts. These have been adapted from the Seattle and Santa Clara plans to reflect the epidemiology in these two states and exposure settings (b)(5)

(b)(5)

Key things to note:

(b)(5)

Please let us know if you have any questions or suggestions.

Best,
Amanda

Subject: FW: Commercial Manufacturing and Procurement MCM TF leadership team

Dear Working Group leads

The MCM task force is standing up a Commercial Manufacturing and Procurement team to advise on when during the R&D life cycle of a product decisions should be made to pull the trigger on scale up activities. What minimal datasets are needed and when, and what are the associated calculated risks that are acceptable? A small team has been working on this already, but now the effort is being broken out into 3 lines of effort (LOE) as outlined in Christy's email below.

Clinical input is most important for LOE 1, and to some extent LOE 2

Please let me know if you can recommend someone in your agency who would be a good fit for either.

Bob

Hello RADM Mermin and Dr. Messonnier,

Sir, thank you for the virtual introduction.

Dr. Messioneer, I look forward to talking to you at your convenience. I am working on a request from the Deputy Secretary and would like your guidance. Please let me know if you have availability this week for a call.

Take care and I hope you both are safe and well.

Best regards,
Sylvia

Subject: Re: Communications Rollout_Actions for Older Adults

Does ASPA have the revised version? Something like that will need to be raised to the TF.

ASPA/CDC- we need to clear this ASAP so it can get over to OVP to be added to agenda for today.

Brian- can we connect with OVP to ask if communications focused toward older adults can be added to agenda? Thx

Awesome
Let me know if I can help

We already messaged it this morning to Congress and the press conference
But not as well

Brett P. Giroir, MD

Subject: RE: Communications Rollout_Actions for Older Adults

Do you have this?
What needs to be cleared by whom?

And I want to be clear that this is directed to older adults in general, not just in a specific place.

We messaged this specifically to Congress this morning.
This needs to get done ASAP.

Judy – happy to come down and understand what you need

Admiral Giroir,

As we discussed yesterday (b)(5)

(b)(5)

(b)(5)

Attached

please find a draft communication plan to roll out those messages. This has not yet had full clearance within CDC nor our normal route of clearance through ASPA at HHS. However, we thought it would be helpful for you before your morning meetings to see what we are proposing. We could complete clearance and roll this out quite quickly.

Thank you,
Nancy

Hi, there!

Just wanted to touch base with you now that we have the greenlight to start scheduling these. Not sure if you've been in touch with Nancy for background, but the chain below is a good starting point. Let me know how you want to go about scheduling, and who from your end we might want to include? (b)(5)

(b)(5) if you want NCIRD OD to put these on the calendar in conjunction with our schedulers, that works too.

Hope you're well!

Ashley

Subject: Hospital Preparedness

Importance: High

This is following up on a quick call between R3, Kadlec, and me just now.

CDC is working on a hospital preparedness document.

ASPR is also working on hospital preparedness bullets based on multi-sector input.

We need to harmonize, put a time line on roll out of what, when, and by whom.

CDC: can you share your draft document which I understand is close to completion?

ASPR: let's put together the bullets from the weekend. Maybe use what I sent this morning as a summary of the discussion?

I will organize a quick call once we can see each other's' ideas.

I think we all agree that we need to push this fairly quickly.

Thanks

Brett

Hi Robert, Peter, Nancy and all,

One suggestion for a framework, that builds on what Robert sent, and Peter's comments for accelerating regulatory/clinical development is as suggested below.
Hope this is helpful as a start - to flesh out what the ASPR was asking for. Apologies for any omissions or oversights.

John

Subject: Secretary memo framework

All,

Thank you again for taking the time to participate in the call today. I am assuming 2-page max for the memo. I've attached a framework. <(b)(5)>

<(b)(5)>

I can always cut it down.

I'll defer to each of you to fill in from your agency's perspective-feel free to mark up what is already there as well.

I'm not sure how to handle the NIH perspective-Hilary and John, can I ask you to coordinate? I'm happy to facilitate in any way-I am just not sure of the proper protocol.

When you send back comments, please 'cc' Andie Vaught as she will help with the collation into one document.

Can I ask for comments by around noon, so I can get a revised hopefully final version out to the group by late tomorrow? that way people can review early Friday, I can put in any last edits, and we can finalize by the deadline?

Thanks a lot.

Subject: RE: Coronavirus Presentation at NVAC

Thank you for all of your work on the response and for being responsive during a very busy time.

The first day of the meeting is focused on vaccine innovation so I thought we would hear presentations about where we are in the development process, with phase 1 trials expected in “about three months” according to a news report I saw. I’ve invited Barney Graham from NIH to discuss vaccine development strategy and progress, Dr. Mark Denison, from Vanderbilt to discuss disease challenges, and Dr. Ralph Baric at UNC to cover virus immunity and the impact of vaccines on animal models of SARS and mers.

I was hoping you all could join in to talk about the outbreak response. This may be even more important if you are not able to send a representative to provide this during the agency updates.

Let me know what you decide to do and if I can help in any way.

Take care!

Subject: Re: Coronavirus Presentation at NVAC

Given the pace of the response, i actually regret to inform you that i will not be able to attend NVAC and neither will anyone from our staff as we are now completely occupied by the response. Unfortunately, Melinda also has a prior commitment and won't be able to attend. We can certainly drive to reserve time to present on 2/13 but would not want to promise anything given how dynamic priorities are. I am curious as to the requested presentation given that vaccines are not going to be imminently available. Is there a specific topic that you were hoping to get NVAC input on?

Subject: Coronavirus Presentation at NVAC

Hi Nancy and Kristen,

Given that coronavirus is all over the news, I am hoping to put together a late-breaking session at NVAC on coronavirus and the status of vaccine development.

I know you all are very busy right now, but would it be possible to secure a CDC expert to provide present on the **afternoon of February 13** (exact time TBD). I can arrange for a remote presentation if that helps, but we would also love to have the speaker come in person if that is an option. Since I do not have an exact time set yet, if the speaker has time preferences, please let me know. I will try to accommodate.

I can provide more details once I have confirmation. I look forward to your positive response. Please let me know if you have questions.

Best,

Ann

Subject: Ebola Sub-PCC scheduled for tomorrow will be cancelled

Dear Colleagues,

I am writing in order to notify you that the sub-PCC regarding the Ebola epidemic in DRC scheduled for tomorrow will be cancelled. <(b)(5)>

(b)(5)

More information will be forthcoming shortly and I apologize for an inconvenience this change may cause. Please feel free to reach out to me if I may be of assistance.

Lastly, thank you for your continued support and hard-work on this very important issue.

Best regards,

Phil

Subject: SARS-CoV-2 Vaccine Working Group

When: Thursday, April 16, 2020 2:00 PM-3:00 PM (UTC-05:00) Eastern Time (US & Canada).

Where: WebEx for the foreseeable future

Dear all,

You are invited to share progress and discuss issues relevant to the development of vaccines against COVID 19 on a weekly basis with your PHEMCE colleagues.

An agenda, presentation materials and supporting documents will be provided in advance of the meetings.

Many thanks in advance for your participation,

Armen, Cristina and Erik

Okay, so can you organize based on the below? I would like us to decline being at the dry run and just say we'll be at the 945. I would suggest just a slide with high level bullets – it does not have to say much. I have a 10:00 with approps staff so maybe Amanda should join. And Marty. I also have to admit that I cannot tell how long this is. And if it's a call or something in the SCIF.

Thanks.

I can hopefully deconflict:

S1 COS confirms that S1 is well briefed on influenza absent a major change since 1/9.

But also confirmed need for update brief on novel coronavirus, as news has been continuing to come in and there was a PCC this morning.

On Jan 14, 2020, at 1:35 PM, Messonnier, Nancy (CDC/DDID/NCIRD/OD) <nar5@cdc.gov>wrote:

I am a little confused so want to get us all on the same page. Did the secretary ask for another briefing given that we briefed him last Thursday on both flu and coronavirus? I had understood that you were putting this into your regular slide deck and we were just joining the call in case he had questions. We are happy to do either but just want to be clear.

Thank you.

Dr. Messonnier,

- CAPT John Redd just notified the HHS SOC that you will brief out on Novel Coronavirus and possibly Influenza for tomorrow's HHS S1 Brief.
- Currently there is a "Dry Run Brief" with Kr. Kadlec at 0915ET followed by the actual S1 Brief at 0945ET.
- The SOC will send you the call in number.
- Attached is the S1 Brief Slide format that will be used. Please reply to all when providing your slide and it will be inserted into the S1 slide deck.
- If you could provide the CDC Slide today or at least by 0815 tomorrow, 15Jan20, it would be appreciated.

Please let us know if there are any questions.

Vr,
Bob

Subject: Information for Clinicians on COVID-19 Therapies

Dear Dr. Redfield,

I attached a summary of the document requested "Information for Clinicians on COVID-19 Therapies." I also attached a summary of applicable clinical trials compiled by my team this evening (includes information on trials worldwide) for background in case this information might be useful. Let me know if you have any questions.

Thanks,

Tim

Thanks Nancy.

In the short term, can we use the bullets below as CDC cleared recommendations?

And I assume everyone is coordinated from the listening session last week via ASPR?

Brett P. Giroir, MD

Information on Newly Confirmed Cases

None in last 24 hours

Patients Being Medically Evaluated in US*

	PUI Numbers *Excludes those with contact to known case
Total # PUIs identified*	219
PUIs from the prior 24 hours	23
Total # confirmed cases	8
Total # PUIs with pending test results	83
Total # PUIs with negative test results	128
PUI reported by HD/clinician	134

Data as of 18:07, 01 Feb 2020

- • Additionally, **42** PUIs have been reported and are being assessed with contact to confirmed cases. So, far one has been confirmed as a case.

*We are continuing to revise the process and validate/de-duplicate the data. This means the numbers will be susceptible to change as we implement the systems needed to monitor the increasing number of requests and the variability of submission data from our public health partners.

Travel and Airport Screening:

- • 3,087 travelers have been screened as of Jan 31st. To-date, five persons have been referred for medical evaluation following entry screening and station illness response activities, and one tested positive.
- • Continuing traveler illness response, health information sharing, and screening of persons with travel history to Wuhan at ports of entry.
- • Risk assessment and public health management guidance for persons with travel history in China in clearance.
- • Met with FAA, DHS and HHS to discuss proposed plan for monitoring of airline crew with travel history in China
- • 1/31: USG Travel **Announcement**
 - CDC working with local and state HDs and other USG agencies on operational plans to implement mandatory screening and quarantine for travelers who have been in Hubei Province in the past 14 days, and monitored self-quarantine for travelers who have been in China in the past 14 days
- • **Repatriation of USG and American Citizens from Wuhan**
 - CDC supporting travelers residing at March AFB. Arrived Jan 29.
 - 195 evacuees evaluated, no medical referrals
 - 174 evacuees provided specimens for lab testing; results pending
 - CDC supporting plans for repatriation of 800+ American citizens to US sites; expected arrival starting on Feb 3. Site for housing persons in discussion.

Screening of passengers coming to US on indirect flights from Wuhan continues (low numbers). No medical referrals in past 24 hours

International Updates

As of Feb 2, 2020 12:00 AM

nCoV in mainland China

	Confirmed Cases	Severe Cases (%)	Deaths	Affected Provinces	Suspected Cases	Total Contacts Traced	Confirmed Unobserved
Total	14,380	(15%)	304	31	19,544	163,844	137
New	2,590	(12%)	45	0	4,562	26,857	27

Restrictions and Repatriations

- Additional travel bans in Australia and Philippines
- Apple closed all stores in China until February 9th
- German evacuees from Wuhan to undergo 14-day quarantine on a military base in Germany

Additional information

- WHO confirmed case definition updated to "A person with laboratory confirmation of 2019-nCoV infection, irrespective of clinical signs and symptoms"

Cases outside of China

- No new countries reporting cases in last 24 hours
- 7th case in Vietnam reported to be American Citizen who transited Wuhan for 2 hrs on Jan 15
- First death outside of mainland China reported in Philippines
- Additional cases without evidence of travel to mainland China in Republic of Korea, Vietnam, and Germany

I want to share with you the product of the BCG team who drafted the attached briefing and Decision Memo drafted for the Secretary's review tomorrow. I want to thank all those who contributed over this holiday weekend to offer their ideas and concepts that is represented in these products. This represents just a first step of many steps that first outlines a concept that will then be operationalized into a historic effort for not only the Department and agencies who will contribute to it, but to our Nation. Again, thank you for your contributions and commitment. Best Bob
