

## Participation in v-safe helps protect all Americans from COVID-19. Here's how:

- Users register and share their vaccination experience with **v-safe**
- Participant's vaccine experience information is combined with information from millions of Americans also enrolled in **v-safe**
- CDC studies and analyzes the information and compiles vaccine safety profiles to share with the public
- Americans who have not yet been vaccinated learn about the safety of COVID-19 vaccines and can feel confident getting vaccinated
- More people in our communities get vaccinated
- We are all better protected from COVID-19
