Hi Mr deGaray,

The reporting line I mentioned is the one that we are asked to follow.

VAERS is an open system and anyone my report an event. It doesn't have to be a doctor making the report.

VAERS does check against reports to the FDA as they don't want to double count an event.

Dr Frenck,

If that is the case you should still be able to get the tracking number. Also you should have a list of the side effects/adverse reactions you supplied to them, we would like a copy/list of them. We don't want duplicate your submission, but we want to make sure these items are reported.

Thank you,

Patrick

Mr De Garay,

Our chain of reporting is to the FDA through the Sponsor.

Kristen,

Sorry to bother you again but could you send the VAERS ID confirmation number along with all the symptoms side effects you submitted to them.

Hi Patrick,
Yes, all of Maddie's symptoms have been reported to the FDA.

Kristen,

Just want to confirm that all the side effects that we have communicated to both you and the Gamble team since January 2021 have been reported to the CDC. With everything we went through we wanted to be sure the info has been reported to cdc VAERS reporting.

Kristen,

We received the vaccination record for Maddie, but there is no date listed for the 2nd shot. Would you please correct this and amend the vaccine record for [REDACTED] as well.

Thank you,

Patrick
