*Re: Removal of Reports from the Vaccine Adverse Events Reporting System*

Dear Director Walensky,

We write again on behalf of Informed Consent Action Network (“ICAN”) regarding the recent removal of 1,102 reports from the Vaccine Adverse Event Reporting System (“VAERS”), including reports of 225 deaths, 16 life-threatening events, 51 ER visits, and 108 hospitalizations.<sup>1</sup>

Even more concerning is that a majority of these records, 784 out of the 1,102 reports, involved Janssen’s COVID-19 vaccine, which recently had its Emergency Use Authorization revoked by the FDA.<sup>2</sup>

VAERS is one of the only systems available to assess the safety of vaccines, especially those still under emergency use authorization. The removal of reports degrades the integrity of this system and deepens the growing distrust of federal health agencies.

Please explain why these reports were deleted and whether the CDC intends to restore them back to the VAERS system. We request the courtesy of a substantive response to this important issue by June 15, 2023.

Sincerely,

Aaron Siri, Esq.  
Elizabeth A. Brehm, Esq.  
Catherine Cline, Esq.

---
