

Is there published guidance on this?

**From:** [REDACTED] [REDACTED] [REDACTED] [REDACTED] [REDACTED] [REDACTED] <EMILIA.ANIS@MOH.GOV.IL>

**Subject:** RE: Touch base with U.S. CDC re: vaccine safety

Dear Tom,

I will take this opportunity to consult you on another issue. We are issuing guidelines for intradermal monkey pox vaccination. If by mistake the dose for ID administration was given IM, do you recommend to repeat the dose?

With best regards,

Emilia Anis, MD, MPH  
Director  
Division of Epidemiology  
Ministry of Health, Israel

Dear Emilia,

Thank you so much. No rush, it's not super urgent.

Regards,

Tom

Dear Tom,

Thanks for your mail.

I approached my colleagues from the MoH, but because we have high holidays now (only today is a working day – and then Sukkot until 18<sup>th</sup> of October ) – we will discuss it upon getting back to work and I will update you soon ( there are no more holidays in the next two months 😊)

Best regards from Jerusalem,

Dear Dr. Anis,

I hope you are doing well. My name is Tom Shimabukuro and I'm with the CDC's Immunization Safety Office. Lauri Markowitz gave me your contact information. I'm wondering if you and your colleagues might have some time for a call to discuss the recent VSD publication on aluminum adjuvants and asthma risk and whether you think this is an issue you might be able to study in the Israeli data. If you are willing and there are some good dates and times please let me know and I will work on setting up a call. Thanks.

Regards,

Tom
