Dear Mr. Siri:

This letter is regarding your Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) Freedom of Information Act (FOIA) request of December 13, 2021, assigned #22-00518-FOIA.

We located 242 pages of responsive records (237 pages released in full or part). After a careful review of these pages, some information was withheld from release pursuant to 5 U.S.C. §552 Exemptions b(5) and b(6). The foreseeable harm standard was considered when applying these redactions. The responsive records are available to download at the link below:

Exemption 5 protects inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency. Exemption 5 therefore incorporates the privileges that protect materials from discovery in litigation, including the deliberative process, attorney work-product, and attorney-client privileges. Information withheld under this exemption was protected under the deliberative process privilege. The deliberative process privilege protects the decision-making process of government agencies. The deliberative process privilege protects materials that are both predecisional and deliberative. The materials that have been withheld under the deliberative process privilege of Exemption 5 are both predecisional and deliberative, and do not contain or represent formal or informal agency policies or decisions.

Exemption 6 protects information in personnel and medical files and similar files when disclosure would constitute a clearly unwarranted invasion of personal privacy. The information that has been withheld under Exemption 6 consists of personally identifiable medical and contact information. We have determined that the individuals to whom this information pertains has a substantial privacy interest in withholding it.
