DR. ANDREW WAKEFIELD AND HIS NEW FILM PROTOCOL-7

Catharine Layton
COO, ICAN
Supervising Producer,
The HighWire

Welcome to *The Informant*, our new monthly magazine offering curated news and exclusive content to supporters of the Informed Consent Action Network. We really wanted to provide something more to those supporters who give something more. *The Informant* features exclusive interviews, articles, and a breakdown of our most impactful work over the past month.

When *The HighWire* premiered in 2017, we imagined a news program where we could report on the important news ICAN was making, but we hadn't considered at the time that there would be too much news for us to cover in our weekly show. During production meetings, we are often faced with the difficult decision of cutting important stories simply because there is not enough time to cover every breaking story, and every action ICAN is taking. *The Informant* provides a platform to bring you those important stories, highlight ICAN's most significant actions, and direct your eye to informative content you may have missed in the previous month.

ICAN's legal footprint is vast, spanning thousands of FOIA requests, numerous lawsuits & petitions to regulatory agencies, in-depth investigations of important health issues facing the public, publication of white papers, and more.

Also, expect to find behind-the-scenes interviews with our CEO, Del Bigtree, a breakdown of things we aren't able to cover extensively on *The HighWire*, and other articles only available here, for you.

Part of what I think makes ICAN unique is our relationship with our supporters, who make all that we do possible. Our team really has a passion for providing information directly to the public, so they can make truly informed decisions for themselves and their families. We have all been on a journey together since our founding in 2016, and *The Informant* is another exciting path along that journey. I hope that you find it insightful, interesting and informative.

LEGAL UPDATES

- 04 FINAL BATCH OF PFIZER DOCUMENTS FOR AGES 16+ (ACCORDING TO FDA) FINALLY RELEASED TO THE PUBLIC**
- 05 CDC HAS NO DATA TO SUPPORT ITS TWEET TELLING AMERICA THAT IT IS SAFE TO GIVE THE MONKEYPOX, FLU, AND COVID SHOTS TOGETHER**

FINAL BATCH OF PFIZER DOCUMENTS FOR AGES 16+ (ACCORDING TO FDA) FINALLY RELEASED TO THE PUBLIC

WHAT YOU NEED TO KNOW:

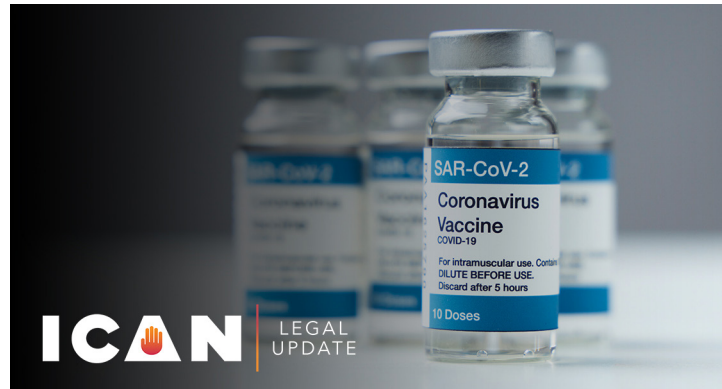

- ICAN lawsuit required the FDA to produce the Pfizer documents at an accelerated rate of 55,000 pages/month
- Documents raise concerns about the effectiveness of various safety surveillance programs, including VAERS, V-Safe, VSD, and the Sentinel/BEST systems

Key Terms:

- CBER: Center for Biologics Evaluation and Research
- COMIRNATY: Pfizer COVID-19 vaccine
- PMR: Post-Marketing Requirement
- FDAAA: Food and Drug Administration Amendments Act
- BEST: Biologics Effectiveness and Safety
- VAED: Vaccine-Associated Enhanced Disease

ICAN can finally announce that FDA now represents that it has produced all documents in the biologic product file of Pfizer's COVID-19 vaccine for ages 16 and up. With this final batch, the documents, presumably those relied upon by FDA to approve the vaccine, are **finally in the hands of the public, where they belong, 800 days after approval!**

As you'll remember, the attorneys who represent ICAN also represent a plaintiff that won a [historic lawsuit](#) against FDA, which forced it to produce the [Pfizer documents](#) at a rate of 55,000 pages per

month, as opposed to the 500 pages per month that FDA originally sought. The [final batch](#) of these court-ordered documents was just released. Now, independent scientists and researchers can see everything FDA saw when it made its decision that this vaccine was "safe and effective."

Of the 51,893 pages in this [final production](#), the following are of particular interest:

[CBER Sentinel Program Sufficiency Assessment](#) –

This FDA memo specifically evaluated the ability of the Sentinel Program—"[FDA's national electronic system](#) [used to] monitor the safety of FDA-regulated medical products"—to evaluate the risk for myocarditis and pericarditis following receipt of the Pfizer vaccine. It [found](#):

The CBER Sentinel Program is NOT sufficient to assess the serious risks of myocarditis and pericarditis, and subclinical

myocarditis associated with COMIRNATY (BNT162b2) in lieu of PMR safety studies under FDAAA.

This inability of Sentinel to provide critical data is notable when one looks at the bigger picture. Federal health authorities consistently claim the COVID-19 vaccines have been subject to the most robust safety surveillance programs in history. Those programs are VAERS (which they always claim can never "prove causation" and which has [numerous issues](#)), V-Safe ([data](#) which should have troubled authorities), VSD (data the public does not have access to and cannot replicate), and the Sentinel/BEST systems. When looked at individually, each of these has serious shortcomings, to say the least.

There are VAERS reports of deaths due to COVID-19 in patients reported to be fully vaccinated. **It is expected there may be some cases of vaccination failure, especially in elderly or**

immunocompromised subjects. Generally, passive surveillance and spontaneous adverse event reporting cannot be used to draw conclusions regarding vaccine effectiveness due to the lack of a control group, reporter bias, and underreporting. **Severe manifestations and death from COVID-19 raise the possibility of vaccine-associated enhanced disease (VAED),** which has overlapping clinical manifestations with natural SARS-CoV-2 infection, making it difficult to differentiate VAED from severe COVID-19 disease in individual VAERS reports. VAED is being assessed in a continuation of the Phase 3 clinical studies and active surveillance studies being conducted by the sponsor. [Emphasis added.]

As noted, a good amount of the data produced by the FDA is redacted. ICAN's attorneys may challenge some redactions, as well as attempt to obtain email attachments and reports mentioned but not included in the records produced.

ICAN continues to encourage all interested parties to sift through the data and evaluate for yourselves how well FDA fulfilled its duty in vetting this vaccine.

You can view the entire production [here](#) and read the full legal update [here](#).

CDC HAS NO DATA TO SUPPORT ITS TWEET TELLING AMERICA THAT IT IS SAFE TO GIVE THE MONKEYPOX, FLU, AND COVID SHOTS TOGETHER

In response to a FOIA request by ICAN's attorneys for studies and data supporting CDC's claim that it is safe to give the monkeypox vaccine at the same time as both the COVID and flu shots, CDC comes up with nothing but its own statements.

On January 20, 2023, CDC [tweeted a video](#) from the [White House MPox Response Team](#), titled, "Can I get my mpox vaccine at the same time as my flu & COVID vaccines?" In the video, Dr. Demetre Daskalakis, Acting Director of the National Center for Immunization and Respiratory Diseases, answers, "yes," all three shots can be received at the same time.

Dr. Daskalakis's only caution was that people who have or are at risk for heart disease "may" consider delaying their COVID shot for four weeks after getting their monkey pox shot because of a "possible risk" of heart

inflammation associated with these two shots.

What the video neglected to include, however, was any data to support this safety claim, or any mention of the fact that thousands of COVID-19 vaccine recipients have reported cases of [myocarditis and heart injuries](#), both of which are also associated with the [flu shot](#) and [monkey pox vaccine](#), as well as the [smallpox vaccine](#) (an orthopoxvirus related to monkeypox).

So, in March 2023, ICAN's attorneys sent a [FOIA request](#) to CDC asking it to

Lead Counsel, Aaron Siri, Esq. breaks down the shocking admission here:

back up its claims on the safety of co-administration of these vaccines. But while CDC's [response](#) referenced various sources, **none actually contained any data supporting co-administration.** In fact, CDC's first reference was to the very [same video](#) it *tweeted that made these claims!*

The other pages that CDC cited, which likewise provided no data or studies supporting co-administration of these three shots, and in fact admit this data doesn't exist, included the following:

An MMWR article (CDC's own publication) on the use of JYNNEOS which, incredibly, says point blank: "Clinical trials evaluating the risk for myopericarditis and serious adverse events are needed to ensure that the risks are characterized and guidance about **co-administration of JYNNEOS with mRNA COVID-19 vaccines** can be elucidated."

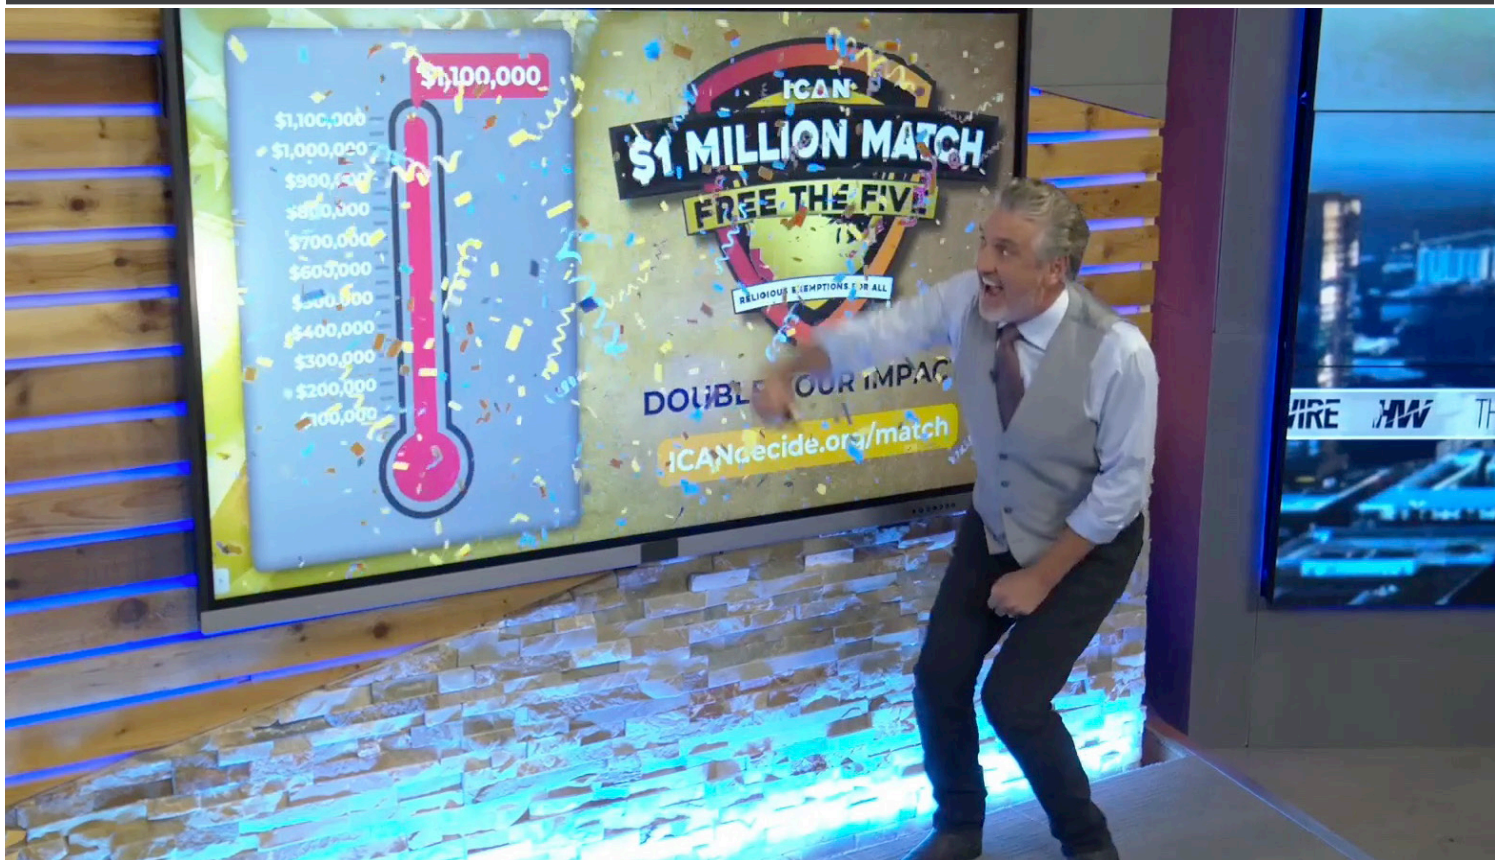

WHAT YOU NEED TO KNOW:

- The CDC tweeted a video from the White House MPox Response Team, claiming the safety of simultaneously administering monkeypox, flu, and COVID shots
- ICAN's attorneys issued a FOIA request for data supporting the safety claim
- In response to the FOIA request, the CDC referenced various sources but provided no explicit data to back its tweet

CDC guidance on how and where to administer vaccines acknowledged "there is limited data on giving COVID-19 vaccines with other vaccines, including flu vaccines."

A webpage with additional MMWR articles, one of which notes "no data exist regarding simultaneous administration of smallpox vaccine with other vaccines."

Based on this production, it is clear that neither CDC nor the White House have data to support their safety assertions surrounding co-administration of these three products which is as unfortunate as it is dangerous, particularly since all three of these products have been linked to serious heart inflammation.

WE DID IT!!!

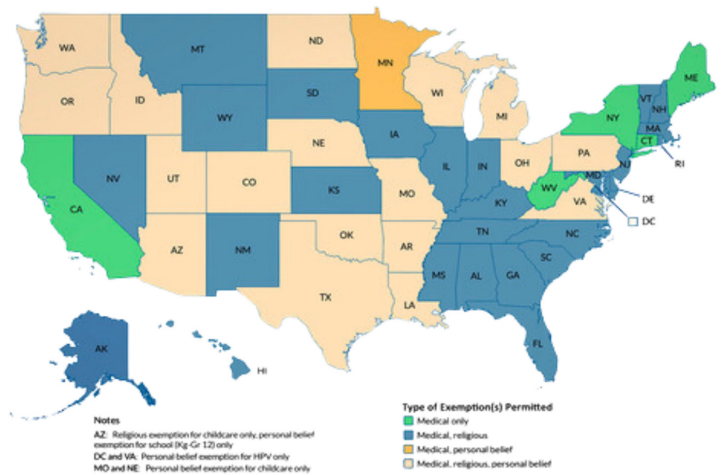

Since [regaining the religious exemption](#) for school children in Mississippi in April 2023, ICAN has supported related litigations in three of the remaining five states without religious exemptions: West Virginia, New York, and California.

ICAN is also supporting cases in Connecticut and Maine that will likely be filed soon. There will need to be more than one litigation filed in four of the remaining five states so that every family in those states is “freed” and permitted to seek a religious exemption for their children. Stay tuned for case updates and more exciting developments!

“I want to thank those special angels who made this \$1.1 million match possible. These gifts make it possible for us to help change the world...to win in cases like Mississippi, to bring informed consent back to this nation, and then hopefully be that beacon of light and hope for the year. I know we’re all anticipating it. We started at \$0 just a few weeks ago and we did it! You did it. You made it possible. What a brilliant ending to this incredible year, 2023.

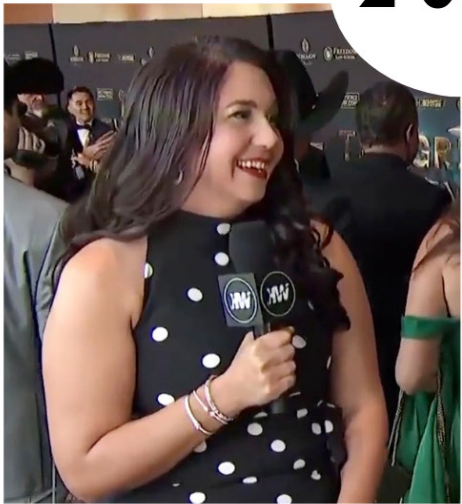

Thank you for all of your support. This is really amazing—our passionate team is so excited. We couldn’t do this without you.” —Del Bigtree

2023

MUST-SEE
MOMENTSTHE HIGHWIRE
WITH DEL BIGTREE

MARLO OAKS | EP 349

Utah State Treasurer, Marlo Oaks, CFA, sounds the alarm on the threat of ESG; Environmental, Social, and Governance standards, which rates businesses on their impact on politically charged issues.

WHAT TO KNOW

- Marlo discusses the push against agriculture to reduce emissions, focusing on land use change and emissions from fertilizers and livestock. The goal is an 85% reduction in land-based emissions in agriculture by 2050.
- He explains proposed rules for conservation leases, replacing mixed-use land management with a focus on ecological services. This shift could adversely affect agricultural production and rural communities.
- Marlo emphasizes the potential harm to rural America, urging people to contact legislators and the SEC to oppose the proposed listing of natural asset companies on the NYSE.

CLICK TO WATCH

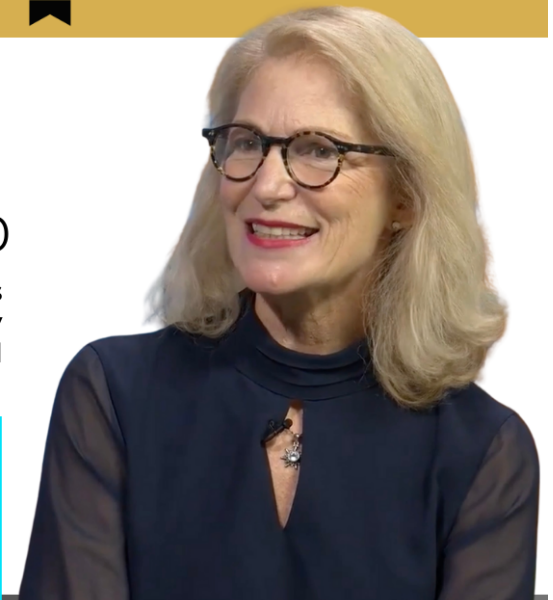

DR. TESS LAWRIE | EP 350

Former World Health Organization (WHO) Consultant Tess Lawrie, MD, PhD, discusses why global health regulatory agencies' motives are no longer about solving health crises and the powerful influence they have on governments worldwide.

WHAT TO KNOW

- External influences, including supranational entities, the military-industrial complex, and the World Economic Forum, shape global health policies.
- Increased awareness and resistance to vaccine mandates challenge those pushing the global health agenda.
- Efforts are being made to establish a legally binding treaty granting the WHO more authority in declaring public health emergencies and managing pandemic responses.
- Outsourcing health decisions has contributed to the current state of global affairs. This is why reclaiming health sovereignty and being proactive in maintaining well-being rather than relying heavily on the medical system is critical.

MUST-SEE MOMENTS

THE HIGHWIRE

WITH DEL BIGTREE

DR. ANDREW WAKEFIELD | EP 351

Dr. Andrew Wakefield returns to *The HighWire* with the worldwide premiere of the trailer for his new, highly anticipated film, *Protocol-7*, chronicling the true story of the historic lawsuit against Merck for fraudulent activity behind the mumps portion of their MMR vaccine.

WHAT TO KNOW

- The narrative on vaccines and autism is changing, with more professionals acknowledging a connection. Wakefield addresses the need for accountability in the pharmaceutical industry while discussing his new film, *Protocol 7*, a whistleblower story from Merck's vaccine lab.
- Tracy Slepcevic, founder of *Autism Health Summit*, shares her motivation for organizing the Summit, emphasizing the need for a supportive community for parents navigating autism.
- The summit in San Antonio is February 2-3, 2024, with virtual attendance options. It will showcase the trailer and select scenes from *Protocol 7*, followed by a Q&A with lead actors, writer-director Dr. Wakefield, and producers.

CLICK TO WATCH

DR. JOSEPH LADAPO | EP 351

Florida Surgeon General, Joseph Ladapo, MD, PhD, discusses a recent letter his agency sent to the FDA and CDC demanding they address DNA fragments found in COVID-19 mRNA vaccines.

WHAT TO KNOW

- Del Bigtree and Dr. Ladapo discuss the potential risks associated with DNA fragments and the lipid nanoparticle delivery system used in mRNA COVID-19 vaccines, and the importance of proper safety studies and due diligence in protecting human DNA.
- They express concerns about the recklessness of rushing booster shots, such as the potential long-term repercussions and also the need for a more cautious approach to vaccine development, with a focus on thorough safety studies and oversight to prevent harm to individuals' genetic integrity.

CLICK TO WATCH

DR. ANDREW WAKEFIELD JOINS DEL ON *THE HIGHWIRE*

By [Lea Lacey](#)

Dr. Andrew Wakefield [recently joined](#) Del in-studio to discuss his new film [Protocol 7](#) and the exclusive event taking place at the upcoming [Autism Health Summit](#) in San Antonio, Texas.

Based on a whistleblower story involving employees from Merck's vaccine lab, the film is confrontational, in-your-face, and names names. Dr. Wakefield describes his motivations behind the film, "I wanted to communicate with many, many more people; there is a certain sector of the population, particularly those who already know this story or are involved in vaccine safety and health freedom, who will watch it. But I wanted to make something that entertains and goes far wider to a global population."

As we know, Dr. Wakefield has monumentally impacted the health freedom movement. When asked by Del if he feels fulfilled, he paused introspectively for several moments before acknowledging that while they have been on the right path, it's painful knowing there are still many damaged children they were unable to help. He describes the journey as fascinating and expresses gratitude for the enormous privilege of reporting their stories in films. "Everything changed with COVID. Suddenly the audience magnified by a factor of 1,000, 10,000. When we started in this years ago, there were probably a handful of people worldwide prepared to discuss this issue. Now it's more

than half the adult population of the world. And that's what winning is. Winning is uncomfortable, it's painful, that's what it looks like."

Wakefield's determination to continue fighting is evident as he states that he is not yet ready to quit and believes there are still several movies in him.

"Winning is uncomfortable, it's painful, that's what it looks like."
—Dr. Andrew Wakefield

The [Autism Health Summit](#) scheduled for February 2-3, 2024, will showcase the trailer and select scenes from *Protocol 7*, followed by a Q&A with lead actors, writer-director Dr. Wakefield, and producers. [Tracy Slepcevic](#), author of [Warrior Mom](#) and founder

of [Autism Health Summit](#), joined the conversation, sharing her motivation for organizing the summit and emphasizing the need for a supportive community for parents navigating autism.

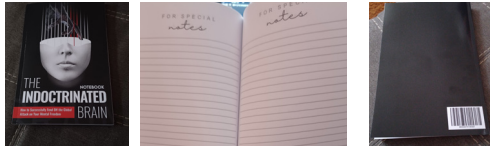

The summit aims to educate parents and address underlying biological conditions associated with autism and other neurological disorders. Notable speakers will include Dr. Andrew Wakefield, Del Bigtree, Mikki Willis, and other prominent figures who have been at the forefront of advocating for health freedom and vaccine safety.

Virtual or in-person admission options are available [here](#).

FACING FAMILIAR FOES: CENSORSHIP STRIKES AGAIN?

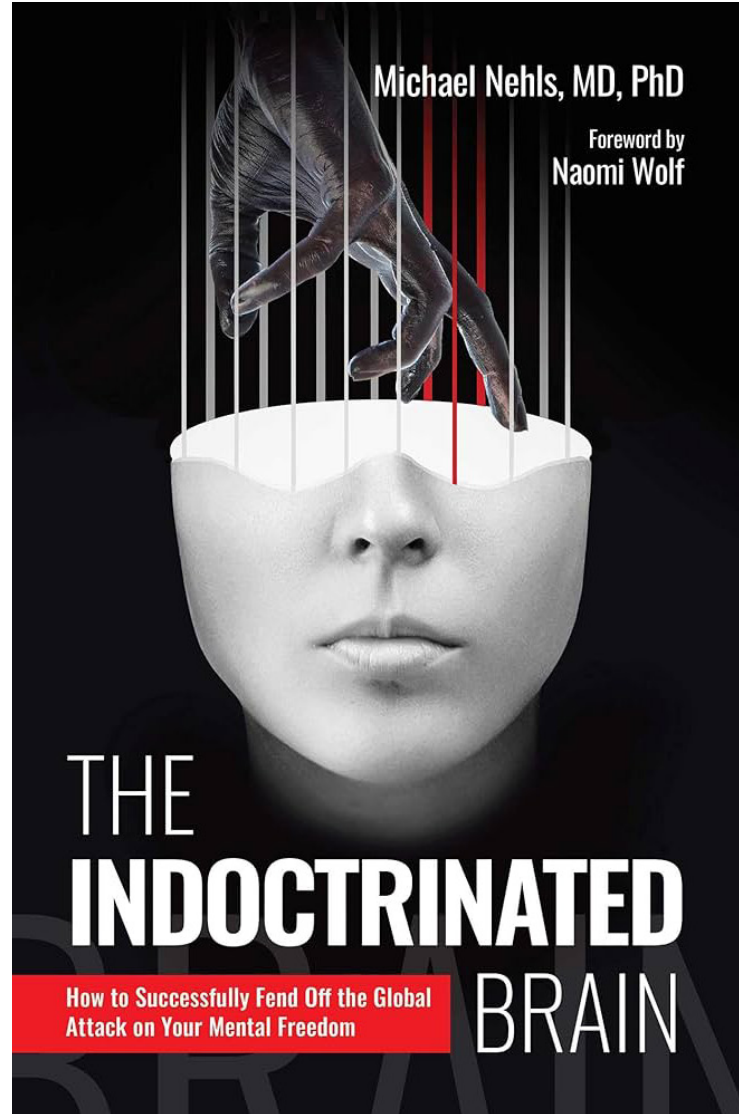

Here at ICAN and *The HighWire*, we are no strangers to censorship. Following Del's [recent conversation](#) with the brilliant physician and molecular geneticist [Dr. Michael Nehls](#), discussing his groundbreaking new book, *The Indoctrinated Brain*, many book retailers showed that it's 'out of stock.' Emails came pouring in asking where else the book was available, with one person even reporting that they received a copy from Amazon with *blank pages* inside.

ICAN purchased a batch of books directly from the publisher, and we are proud to announce that Dr. Nehls' new book is now available at icandecide.shop.

Going beyond the conventional understanding of brain health, *The Indoctrinated Brain* emphasizes the critical role of maintaining hippocampal health, not only for safeguarding against diseases like Alzheimer's, but fortifying the mind against indoctrination. Addressing the global decline in mental capacity, especially among young people, and the alarming rise in depression rates, Dr. Nehls raises crucial questions. With one in forty individuals experiencing early-onset Alzheimer's, he questions whether this is a mere coincidence or part of a masterfully executed attack.

Despite this alarming notion, *The Indoctrinated Brain* serves as a beacon of light and hope as Dr. Nehls lays out brain-damaging processes and practical countermeasures that anyone can take to protect their mental well-being.

Network

DONATIONS ARE VITAL TO ICAN'S SUCCESS

With your help, we can continue to win pivotal lawsuits, reach new audiences and bring important information to the public.

This historic effort is not possible without your generosity.

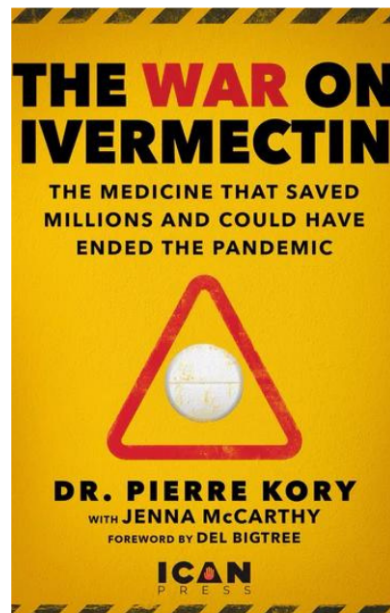

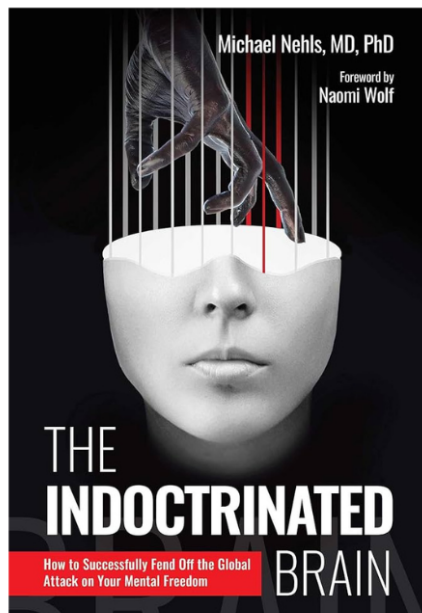

ICAN Press is partnering with dynamic writers, medical professionals, and subject matter experts to bring you a captivating library of published works that seek to inform, empower, and deliver the truth, one publication at a time.

The Indoctrinated Brain

Throughout the world, mental capacity is declining, especially among young people, while depression rates are rising dramatically. But the causes are not being eliminated, quite the opposite. Can this just be coincidence? *The Indoctrinated Brain* introduces a largely unknown, powerful neurobiological mechanism whose externally induced dysfunction underlies these catastrophic developments.

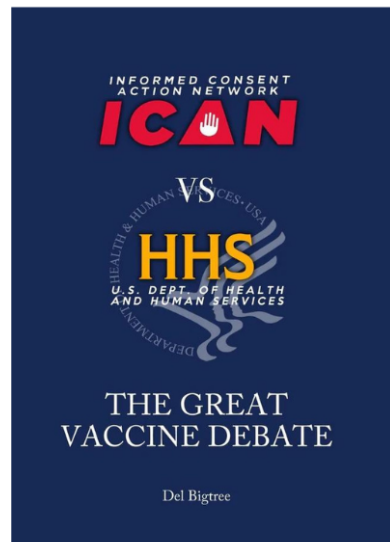

The War on Ivermectin

The War on Ivermectin is the personal and professional narrative of Dr. Pierre Kory and his crusade to recommend a safe, inexpensive, generic medicine as the key to ending the pandemic. Written with Jenna McCarthy, and foreword by Del Bigtree, Dr. Kory's story chronicles the personal attacks, professional setbacks, and nefarious efforts of the world's major health agencies and medical journals to dismiss and deny ivermectin's efficacy.

I'm Unvaccinated and That's OK!

I'm Unvaccinated and That's OK! is the story of an unvaccinated child who shares the many reasons why his parents have chosen not to vaccinate him. Join Nicholas as he shares what it means to be an unvaccinated child in today's world and why one's personal choice regarding vaccination must always be respected.

ICAN vs. HHS

Over the course of one year, the U.S. Department of Health and Human Services engaged in a written debate with *The Informed Consent Action Network* regarding the safety of vaccines. This book contains all of the unedited correspondence, which represents the most thorough discussion on vaccine safety in history.
