Hi Dr. Plotkin,

I do remember that discussion very well. The person who was leading that effort has since retired, I will follow-up and find out who is taking it on.

Thank you!
Amanda

Subject: CDC info sheets

Dear Amanda:

A year or two ago (who can remember that far back in these times?) I brought up the issue of CDC vaccine information sheets and the need to distinguish between validated reactions and phenomena noted rarely that might or might not be truly associated with vaccination. I did have some communication with the person responsible although that conversation sort of trailed off. However, anticipating the licensure of COVID-19 vaccines in 2021, it is not too early to think about what CDC will say.

What are your thoughts on the matter and has preparation begun? I'd be glad to discuss.

Best wishes,
Stanley
