Re: [EXTERNAL] Severe neurological reaction to the Pfizer covid vaccine

I have written to some of you before imploring that the neurological adverse reactions suffered by many thousands from the Covid vaccines be recognized by the FDA, CDC and vaccine manufacturers so that people like me who have been severely injured can get medical care. We need the

8-5-21 email

I have written to some of you before imploring that the neurological adverse reactions suffered by many thousands from the Covid vaccines be recognized by the FDA, CDC and vaccine manufacturers so that people like me who have been severely injured can get medical care. We need the medical community to be educated so they can acknowledge these reactions and try to help us. We need research to be done to understand what has happened to us and how to help us.

We understand what an enormous problem the pandemic is. We are a small piece of this massive problem but want to be addressed as well. As you are getting ready to approve these vaccines, please be transparent to all about the adverse reactions and stop hiding them. It is a tragedy that we have been so seriously injured, not acknowledged and abandoned by our medical community and our country.

If you were in our shoes, I'm sure you would feel as strongly as we do about these issues. We desperately need help and it is time to stop ignoring us.

I personally have been very ill for 7+ months now. My life has been robbed from me with no end in sight. I know that you have heard from many others like me with similar severe prolonged neurological reactions. Many 1000's have reported to VAERS to no avail.

Please acknowledge these reactions and help us. I can't believe such a travesty is occurring to so many people like me in this country. I believe the pandemic can be addressed and we can be helped simultaneously. These two are not mutually exclusive. Please do not forget those seriously injured by the covid vaccines. That is not the American way.

Sincerely,
Danice Hertz MD
