VIA EMAIL AND FEDEX

The Honorable Robert F. Kennedy Jr.
Secretary, U.S. Department of Health and Human Services
200 Independence Ave S.W.
Washington, D.C. 20201
[redacted]

Re: *Immediate Vaccine Reforms*

Dear Secretary Kennedy,

To summarize the reforms requested over the past several months, the following reforms can be implemented immediately by a stroke of your pen:

1. Repeal the PREP Act declaration for Covid-19 medical countermeasures.[1] While you have signaled your intent to repeal the Covid-19 vaccine Emergency Use Authorizations in 12 months, this does not end the liability protection provided by the PREP Act declaration to licensed Covid-19 vaccines.
2. Update CDC's vaccine "Contraindications and Precautions" webpage.[2]
3. Review decisions issued by the Countermeasures Injury Compensation Program (CICP) for the Covid-19 vaccine injured.[3]
4. Order the Task Force on Safer Childhood Vaccines to issue recommendations.[4]
5. Order that all health-related databases accessible by or in the possession of HHS or its agencies be deidentified and made public.[5]
6. Order FDA to issue minimum standards for licensure of vaccines.[6]
7. Amend the Vaccine Information Statement (VIS) for each vaccine to include, *inter alia*, all ingredients and the adverse events listed in Section 6.2 of the relevant package insert. *See* 42 U.S.C. § 300aa-26 (each VIS shall include "such other relevant information as may be determined by the Secretary").[7]
8. Order the retraction/removal of all MMWR articles and other CDC-related publications for which underlying datasets have not been made public.[8]

[8] *See* Task Force Letter, *supra* note 4, at section 1(b).

9. Order that each Freedom of Information Act office within HHS implement the requirements in Section 1(d) of the Task Force letter.[9]
10. Require HHS employees to sign a no-conflict pledge.[10]
11. Require that prior to commencing any HHS-funded study, its design be posted publicly; and require that all study outcomes must be published.[11]
12. Order that HRSA properly administer the Vaccine Injury Compensation Program (VICP), including as provided in Section 7 of the Task Force letter.[12]
13. Fire everyone within FDA's Center for Biologics Evaluation and Research (CBER) division who has previously been involved in licensing any childhood vaccine.[13]
14. Fire everyone within CDC's Immunization Safety Office (ISO).[14]

These are items that can be implemented after the required notice and comment guidelines:

15. Update the VICP Vaccine Injury Table to add injuries required by federal law.[15]
16. Update FDA direct-to-consumer marketing regulations to require full disclosures of harms in broadcast advertising.[16]
17. Require that each health care provider and manufacturer report any adverse event or suspected adverse event occurring within 60 days of vaccination to VAERS *regardless of a causation analysis*. *See* 42 U.S.C. § 300aa-25(b)(C) ("Each health care provider and vaccine manufacturer shall report [to VAERS] … such other matters as the Secretary may by regulation require.")[17]
18. Promulgate a new regulation that all CDC vaccine recommendations shall be shared clinical decision-making.[18]

These are items that can be implemented with approval from the White House:

19. Reconstitute ACIP.
20. Ask ACIP to consider recommending that all vaccines (or at the very least those that do not stop transmission) be categorized as shared clinical decision-making.[19]

Very truly yours,
