Re: *Rate of Adverse Reactions Reported in the Paul-Ehrlich-Institut's May 4, 2022 Safety Report for COVID-19 Vaccines*

Dear Director Walensky:

On behalf of Informed Consent Action Network ("ICAN"), we write regarding a recent statistic concerning the rate of adverse events reported after COVID-19 vaccines issued by the German Federal Ministry of Health Agency, Paul-Erlich-Institut. Specifically, Paul-Ehrlich-Institute's May 4, 2022 Safety Report states the following:

"The reporting rate for serious adverse events was 0.2 reports per 1,000 doses of vaccine."¹

Does the CDC concur with or contest this statistic and on what grounds? ICAN looks forward to your prompt response.

Very truly yours,

Aaron Siri, Esq.
Elizabeth A. Brehm, Esq.
Caroline Cline, Esq.
